90-day look out

The window runs 17 August to 15 November 2026. Three more pre-seed tranches land inside it, on 31 August, 30 September and 31 October, joining the one received on 15 August. Across those four months $270,000 arrives net of the angel repayment against $246,620 of committed spending, and the account clears its floor in November. Everything below comes off the capital deployment plan of 11 August 2026.

$270,000
CAPITAL IN, NET OF THE ANGEL REPAYMENT

$246,620
COMMITTED OUT ACROSS THE WINDOW

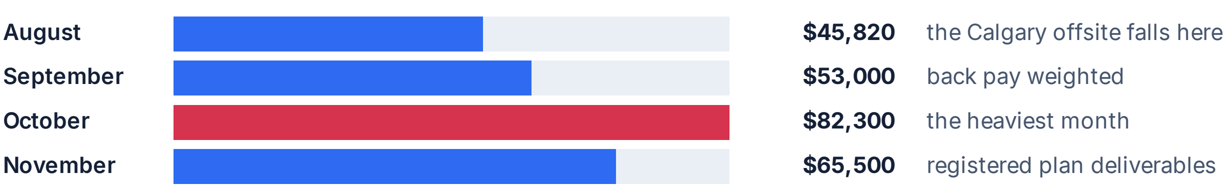
$1,180
THE LOW POINT, AT 30 SEPTEMBER

$22,500
Q4 COSTS AWAITING A DECISION

1 The cash road, month by month

	August	September	October	November
Capital in, net of the angel repayment	$45,000	$45,000	$90,000	$90,000
Money out	$45,820	$53,000	$82,300	$65,500
Repaid to the angel	$5,000	$5,000	$10,000	$10,000
Closing balance	**$4,180**	**$1,180**	**$18,880**	**$53,380**
Against the $25,000 cash floor	Thin	Thin	Thin	Clear

Legend. Tranches arrive on 15 and 31 August, 30 September and 31 October, and each funds the month after it is received. Ten per cent of each of the first four goes to repaying the $50,000 angel cheque, to a total of $30,000. The closing balance sits below the $25,000 floor until November, which is the single thing to watch in this window. Source: 4orm Finance capital deployment plan of 11 August 2026, Canadian dollars.



Bars start at zero and run to $82,300. October carries the second Speer instalment at $20,000 and $9,000 of counsel and advisor payments, on top of a full month of compensation and back pay.

The one thing to watch in this window.

Two of the four tranches arrive on the last day of a month and fund the month after, so a tranche that slips is felt immediately and there is no buffer under it until November. Behind the schedule sit $103,380 of unallocated headroom after a 15 per cent contingency, and a balance that reaches $178,380 by 31 January 2027 if nothing further is approved.

What has to happen, and who is waiting on it

Each item below releases a tranche, removes a cost, or opens the register.

1 Build and design

- The Calgary offsite runs 24 to 27 August with the build partner in the room, budgeted at $6,820.
- The second Speer instalment of $20,000 falls in October, and the scope it buys is settled before it is paid.
- Architecture work now is what makes a provisional filing possible in early 2027.

2 Capital

- Tranches of $100,000 on 30 September and 31 October, each released against evidence rather than a date.
- Registered plan deliverables at $12,500 in November, so shares can be held in a retirement or tax free account.
- Grant cultivation is funded every month. Eight programmes are mapped, none awarded.

3 Market

- The Real Estate Council of Ontario begins collecting trust data through its portal on 1 October 2026.
- AutoRek is the one competitor to check every quarter, and the check is its own website.
- Discovery against the published register, where the first paying cohort comes from in 2027.

2 The decisions owed inside the window

What is being asked	Amount	Why it is here
Tax registration, the tax back, and bank and wire fees	$5,900	It leaves the account either way
Counsel to read the build partner's new proposal	$3,500	The cheapest control in the plan
Cloud, development, staging and the software stack	$4,900	The architecture needs somewhere to run
Directors and officers cover, and bookkeeping	$8,200	Half a million moves through the entity
Total awaiting a decision	**$22,500**	**Headroom is $103,380**

Legend. A further $73,900 is deferred to the first quarter of 2027: counsel on the closings, a provisional patent, trademarks, and the two executive searches.

3 What the window is judged on

The account stays open	The balance clears the $25,000 floor in November at $53,380.
The build scope is settled	Before the October instalment is paid, not after.
The evidence layer moves	The store and the two dates cannot be added afterwards at any price.
The non-dilutive pipeline is live	$305,000 of the $775,000 falls in 2026 and 2027, none of it awarded.

Nothing in this window depends on a customer signing.

The first paying cohort is a 2027 event. These ninety days buy the evidence layer and a settled build scope.
