

The first hundred.

Legacy tokens for the people who help build 4orm.

Most people help build a thing and are forgotten. Not here. The **first one hundred people who help get 4orm off the ground**, paid or unpaid, whether they are with us for three days or three years, have their name added to a permanent list, and each receives **ten legacy tokens**. This is how we tie the people who mattered at the start into what 4orm becomes, for good, and pass it on to the people they love.

1,000	100	10	2%
LEGACY TOKENS IN TOTAL	FOUNDING CONTRIBUTORS ON THE LIST	TOKENS PER PERSON	OF NET PROFIT, PAID YEARLY TO THE LEGACY CLASS

HOW IT WORKS

Your name on the list. The moment you help, you are on it. Paid or unpaid, three days or three years, it does not matter. One hundred names, and no more.

Ten tokens each. One thousand legacy tokens in total, ten to each of the first hundred. That is the entire pool, allocated to the people who showed up first.

A share of the profit, every year. The legacy class is intended to receive 2% of 4orm Finance net profit annually, indefinitely, divided across the tokens and paid out yearly. Ten tokens is one percent of the pool, and at the scale 4orm is built for, it is designed to become a genuine inheritance over time, not a one-time bonus.

BUILT TO OUTLAST YOU

Held in trust. We are working to place the legacy tokens in a trust, for tax efficiency and to protect the people who hold them.

Passed to your family. We are designing custody so tokens can be held securely and transferred to loved ones and family over time. A legacy in the real sense, not a slogan.

The list is real. It is created and tracked today. As the structure is approved, the list comes to fruition, name by name.

WHERE THIS STANDS

Pending securities and legal approval. The legacy token is in the research and discovery phase, being designed with counsel. This page describes our intent, not a finished instrument. It is not an offer, not a promise of payment or value, and the terms may change or may not proceed.

A FIRST OF ITS KIND

To our knowledge, no company has built an instrument quite like this. We are in active compliance and legal discovery right now to structure it correctly, in a way that protects the people who hold these tokens, and their families, indefinitely. Getting that protection right comes before anything issues.

The 2%, and what it could mean.

A closer look at the legacy token, grounded in our model and cast forward.

WHY THE LEGACY TOKEN EXISTS

The legacy token is a way of doing business differently. Some people come in early and, though they do not spend a lot of time with us, they truly move the business. This is how we honor the people who believed in us at the beginning. We believe relationships should last, so we tie those relationships into what 4orm becomes, for good, and pass that on to the people they love.

WHAT THE 2% IS MEASURED ON

The legacy class is intended to share **2% of the Company's profit**, paid yearly. "Profit" here means what is left after the business pays to build and run itself, our EBITDA: revenue minus development and operating costs, before financing and tax. We do not expect a profit in the early build years. In our model the Company is investing and running at a loss while it stands up the platform, and profit begins to build as the institutions come online. The honest way to read the 2% is to start the clock at the point the Company is profitable, and grow from there.

THE ANCHOR: OUR OWN MODEL, AT YEAR FIVE

~\$35M	~88%	~\$700K	~\$7,000
YEAR-FIVE EBITDA (2031, OUR MODEL)	NET MARGIN AT THE LEAN BUILD	2% LEGACY POOL, PER YEAR	PER 10-TOKEN HOLDER, PER YEAR

Source: 4orm 5-year model (v13). Year five, 2031, shows about \$39.5M revenue and \$34.9M net profit. That profit line is effectively EBITDA. Ten tokens is 1% of the 1,000-token pool, so one holder receives 0.02% of profit.

CASTING IT FORWARD: THE 2% OVER A CENTURY

SCENARIO	AVERAGE ANNUAL EBITDA	2% POOL / YEAR	PER HOLDER / YEAR	PER HOLDER OVER A CENTURY
Conservative (hold year five)	~\$35M	~\$700K	~\$7,000	~\$665,000
Matured platform (more institutions)	~\$100M	~\$2.0M	~\$20,000	~\$1.9M
The RWA rail (everybody uses us)	~\$500M to \$1B	~\$10M to \$20M	~\$100K to \$200K	~\$9.5M to \$19M

A century is roughly 95 profitable years from year five. Per-holder figures are for a 10-token holder. The RWA row is a vision, not a forecast: if 4orm becomes the regulated rail where tokenized real-world assets, natural resources, real estate, and commodities reach bank and institutional capital, the profit base is far larger. It is shown as a wide range on purpose.

THE IDEA, IN ONE LINE

Even held flat at what our own model already shows, ten legacy tokens is designed to return on the order of a few thousand dollars a year, for a century, to the people who helped at the start. If the bigger vision lands, it becomes a genuine inheritance. That is what it means to honor a relationship that lasts.

Confidential. For information only. This document is illustrative and is not an offer to sell or a solicitation to buy any security, token, or instrument, and it is not a promise or guarantee of value, profit, distribution, or payment. Figures labeled as model output are drawn from the Company's internal 5-year financial model (v13) and depend on assumptions that may not be realized; the century and RWA figures are conservative long-range illustrations and vision scenarios, not forecasts, and carry very wide uncertainty. The legacy token, the 2% profit share, the basis on which profit is measured, and any trust, custody, transferability, and tax treatment are conceptual and subject to securities and legal review, definitive documentation in the Legacy Token Instrument, and required regulatory approvals, and may change materially or may not proceed. Any distribution, if the program proceeds, is calculated on the audited basis set out in the definitive instrument, which governs and may differ from the EBITDA proxy used here. Nothing in this document is legal, tax, or financial advice. Contains forward-looking statements subject to material risk; actual outcomes may differ. If the Legacy Token Instrument does not materialize, the allocation lapses and no substitute is owed.
