Bruce Fair (Founding Capital Markets Advisor via Mench)	Class A	Allocation to confirm	800,000	800,000	800,000	3.27%	800,000	2.40%
Miika Makela (Capital Strategy Advisor)	Class A	Allocation to confirm	50,000	50,000	50,000	0.20%	50,000	0.15%
Dean McCall (Advisory Council seat)	Class A	Allocation to confirm	400,000	400,000	400,000	1.64%	400,000	1.20%
Keegan Poulton (Speer Technologies)	Class A	Allocation to confirm	125,000	125,000	125,000	0.51%	125,000	0.37%
Matt Mozaffari (Speer Technologies / Founder)	Class A	Allocation to confirm	125,000	125,000	125,000	0.51%	125,000	0.37%
Don Hickling (Advisory Council seat)	Class A	Allocation to confirm	50,000	50,000	50,000	0.20%	50,000	0.15%
James Atherton (Advisory Council seat / Capiche Capital)	Class A	Allocation to confirm	50,000	50,000	50,000	0.20%	50,000	0.15%
Michael Stephens (Advisory Council seat / Fasken)	Class A	Allocation to confirm	50,000	50,000	50,000	0.20%	50,000	0.15%
Zed (Advisory Council seat / Head Architect)	Class A	Allocation to confirm	50,000	50,000	50,000	0.20%	50,000	0.15%
Angelo Aquino (RWA Advisor)	Class A	Allocation to confirm	20,000	20,000	20,000	0.08%	20,000	0.06%
Dean Hesse (Research Advisor)	Class A	Allocation to confirm	20,000	20,000	20,000	0.08%	20,000	0.06%
Louise Royer	Class A	Allocation to confirm	20,000	20,000	20,000	0.08%	20,000	0.06%
Don Hickling — purchased shares	Common	Paid; confirm issuance	200,000	200,000	200,000	0.82%	200,000	0.60%
First-tranche investors	Common	Unallocated target	—	1,000,000	1,000,000	4.09%	1,000,000	3.00%
SAFE investors	Future equity	Proposed financing	—	—	3,261,538	13.33%	3,261,538	9.78%
New option pool	Reserve	Seed assumption	—	—	—	—	3,335,664	10.00%
Seed investors	Preferred	Seed assumption	—	—	—	—	5,559,441	16.67%
TOTAL			20,200,000	21,200,000	24,461,538	100.00%	33,356,643	100.00%

The new C\$2.5M excludes Don's historical C\$50K. Don's advisor and purchased shares remain separate.

At SAFE cap: before new seed cash and the new option pool. After seed: uses the live seed valuation, discount and pool inputs.

Cash paid does not establish that shares were legally issued. Signed agreements and the corporate register control legal ownership and voting rights.

4orm Finance — vesting and transfer terms

Founder and advisor allocations are retained for review. Dates, vesting, voting and transfer provisions require confirmation against signed agreements. SAFE holders do not own shares before conversion.

Holder	Role Type	Total Shares	% of Founders	Vest Length	Cliff	Signing %	Reverse Vesting	Repurchase Price	Signing	Mo 12	Mo 24	Mo 36	Mo 48	Mo 60	Voting Trust

INVESTOR SHARES AND TRANSFER TERMS — CONFIRM SIGNED DOCUMENTS															
Don Hickling — purchased shares	Investor	200,000	0.60%	To confirm	To confirm		Not assumed								No
First-tranche investors	Investor	1,000,000	3.00%	To confirm	To confirm		Not assumed								No
SAFE investors — at modelled seed conversion	Investor	3,261,538	9.78%	To confirm	To confirm		Not assumed								No
Seed investors — at modelled seed close	Investor	5,559,441	16.67%	To confirm	To confirm		Not assumed								No

Investor percentages above use the fully diluted seed denominator. No four-year investor transfer schedule is assumed without signed terms. Founder/advisor mechanics below are proposed terms to confirm, not a legal determination.

REVERSE VESTING MECHANICS — how repurchase rights work	
Concept (Founders/Advisors)	All shares issued at signing (legal ownership). Company holds repurchase right over unvested portion. As shares vest each month, they become non-repurchasable.
Advisor repurchase	Advisors paid \$0.001/share at issuance → company repurchases unvested at \$0.001/share (returns their money). Repurchase right exercised within 90 days of departure.
Founder repurchase	Founders received shares at \$0.0001/share (nominal) → company repurchases unvested at \$0.0001/share. Repurchase right exercised within 90 days of departure.

Investors — NO reverse vesting	Purchased shares and SAFE rights follow the signed agreements and applicable law. No investor reverse vesting is assumed by this model.
Louise exception	Louise Royer FULLY VESTED at incorporation — no reverse vesting, no transfer restrictions.
Termination triggers (advisors/founders)	Reverse vesting activates on: (a) voluntary resignation, (b) termination for cause (breach, misconduct), (c) failure to perform advisory duties, (d) death/disability (Board discretion may waive).
Change of control	Single-trigger acceleration: 25% of unvested shares accelerate on CoC. Double-trigger: additional 50% if terminated within 12 months of CoC. Founders may negotiate 100% acceleration.
Board discretion	Board can waive repurchase right at their discretion (amicable departure, good leaver treatment). Requires majority Board approval.

INVESTOR TRANSFER RESTRICTIONS & RIGHTS — how investor shares are controlled without reverse vesting

Transfer restriction schedule	4-year with 1-year cliff. Month 0-12: NO transfers permitted. Month 12: 25% becomes transferable. Month 12-48: linear monthly release. Month 48: 100% transferable.
Applies to	Don's purchased shares, first-tranche shares, SAFE rights and seed shares: restrictions, if any, must be established by signed documents.
Right of First Refusal (ROFR)	Company (or Board designee) has first right to purchase any shares an investor wishes to transfer. Investor must offer company matching terms first. 30-day company response window.
Co-sale / tag-along rights	If a founder sells shares to a third party, investors have the right to sell their proportional share in the same transaction at the same price.
Drag-along rights	If holders of >66.7% of shares approve a company sale, all other holders (including investors) are dragged along at the same terms. Prevents holdout blocking a good exit.
Approved transferees	Standard permitted transferees (spouse, family trust, estate on death, wholly-owned entity) may receive shares without triggering restrictions, provided they sign joinder to same restrictions.
Change of control	All transfer restrictions terminate on acquisition, IPO, or company dissolution. Shares become freely transferable at that point.
Enforcement	Any transfer in violation of these restrictions is VOID and does not transfer legal title. Company may seek injunctive relief.

DEPARTURE SCENARIOS — 100,000 shares example (4-yr vest, 25% signing, advisor \$0.001 repurchase)

Departure Month	Vested Shares (Kept)	% of Grant Kept	Subject to Repurchase	% Repurchased	Repurchase Cost to Company
Day 1	25,000	25.0%	75,000	75.0%	\$75.00
Month 6	34,375	34.4%	65,625	65.6%	\$65.63
Month 12	43,750	43.8%	56,250	56.3%	\$56.25
Month 18	53,125	53.1%	46,875	46.9%	\$46.88
Month 24	62,500	62.5%	37,500	37.5%	\$37.50
Month 36	81,250	81.3%	18,750	18.8%	\$18.75
Month 48 (full)	100,000	100.0%	0	0.0%	\$0.00

4orm Finance — financing terms

C\$2.5M of new money. C\$500K in shares, followed by C\$2M in SAFEs. Canadian dollars. 28 September 2026.

INPUTS AND SHARE COUNTS

Founding allocation	20,000,000	Allocated shares used for modelling; confirm issued register.
Don — historical investment	\$50,000	Paid per founder. Separate from the new C\$2.5M target.
Don — price per share	\$0.25	Confirm issuance against the signed subscription and register.
Don — purchased shares	200,000	Separate from his advisor allocation.
Shares before the new raise	20,200,000	Includes Don's purchased shares.
New pre-seed target	\$2,500,000	Target closing October–December 2026.
First tranche — share subscription	\$500,000	Investor group unallocated. No individual commitment assumed.
First tranche — price per share	\$0.50	Proposed subscription price.
First tranche — new shares	1,000,000	Purchased shares, not SAFE conversion shares.
Shares after the first tranche	21,200,000	Before any SAFE conversion.
SAFE portion	\$2,000,000	New money still to be raised after the first tranche.
SAFE post-money cap — provisional	\$15,000,000	Single-cap planning assumption for the full SAFE portion. Not agreed.
SAFE discount — draft assumption	15.00%	Retained for modelling. Set to 0% for a cap-only SAFE. Not agreed.

MFN / additional investor rights

To be agreed

No automatic repricing modelled. Signed terms control.

DILUTION IF THE SAFE CONVERTS AT ITS CAP

First tranche — implied pre-money	\$10,100,000	Based on the share count immediately before the first tranche.
First tranche — implied post-money	\$10,600,000	Applies to the share tranche only, not the whole mixed round.
SAFE ownership before seed / pool	13.33%	Cap conversion illustration. Actual conversion is modelled on Seed Dilution Model.
SAFE shares at cap	3,261,538	Modelled equivalent shares; none issued merely by funding a SAFE.
Total shares on cap conversion	24,461,538	Excludes seed shares and a new option pool.
First-tranche ownership after SAFE	4.09%	The SAFE dilutes the first-tranche shareholders too.
Combined new-round ownership	17.42%	C\$500K share investors plus C\$2M SAFE investors. Excludes Don.
Existing-holder ownership retained	82.58%	Founding allocations and Don's purchased shares.
Chad ownership after cap conversion	66.39%	Economic ownership only. Voting agreements are not modelled.
Cap for exactly 20% combined ownership	\$12,469,136	Cap-only calculation before seed and pool; not a recommended valuation.

CAP COMPARISON — BEFORE SEED AND OPTION POOL

Post-money cap	SAFE ownership	Combined new-round ownership
\$12,500,000	16.00%	19.96%
\$15,000,000	13.33%	17.42%
\$18,000,000	11.11%	15.30%

\$20,000,000

10.00%

14.25%

These cap comparisons assume the cap sets the conversion price. A lower seed price or discount can increase SAFE ownership.

Confirm the legal issuer, share classes, existing rights and securities exemptions with counsel. This model does not establish legal issuance or investor commitments.

A Canadian YC cap-only form does not include the draft 15% discount or automatic pro-rata rights. Any additional terms require agreement.

4orm Finance — seed dilution

One live calculation. Change the blue inputs to test seed pricing and option-pool size. Fully diluted economic ownership.

SEED INPUTS

Seed opening target	Q3–Q4 2027	Timing depends on customer evidence and runway.
Seed new money	\$5,000,000	Provisional financing target.
Seed pre-money valuation	\$25,000,000	Illustrative, not agreed. Includes converted SAFEs and the new pool.
New option pool — post-seed target	10.00%	Unallocated reserve, not employees or grants already issued. Assumes no existing pool.
SAFE discount	15.00%	Lower of the cap price and discounted seed price is used.
SAFE post-money cap	\$15,000,000	Same cap for the full SAFE portion.
SAFE principal	\$2,000,000	Converts at the modelled priced seed.

CONVERSION AND SHARE CALCULATION

Shares before conversion	21,200,000	
Seed funding / pre-money	20.00%	Seed investor ownership is this ratio divided by one plus this ratio.
Pool fraction before seed money	12.00%	Pool is created pre-money to reach the post-seed target.
Discounted valuation basis	\$18,700,000	Adjusted for the new pool to compare against the SAFE cap.

Conversion valuation basis	\$15,000,000	Algebraic basis for the selected conversion price.
SAFE fraction before pool / seed	13.33%	Must be below 100% for this model to be feasible.
SAFE conversion shares	3,261,538	Fractional model shares retained; legal issuance rounding to be confirmed.
Shares after conversion	24,461,538	Before the new pool.
New option-pool shares	3,335,664	Assumes the entire pool is newly created at seed.
Fully diluted shares before seed cash	27,797,203	Converted SAFEs plus the pool included in seed pricing.
Seed price per share	\$0.8994	Displayed to four decimals for checking.
SAFE cap price	\$0.6132	Excludes the new seed option pool.
Discounted seed price	\$0.7645	
SAFE conversion price	\$0.6132	
New seed shares	5,559,441	Purchased by new seed investors.
Fully diluted shares after seed	33,356,643	Includes the unallocated option pool.

OWNERSHIP AFTER SEED

Existing holders including Don	60.56%
First-tranche investors	3.00%
SAFE investors	9.78%
New option pool	10.00%
Seed investors	16.67%

Chad

48.69%

Included in existing holders; do not add again.

RECONCILIATION

Ownership total less 100%	0.00	
Pool less target	0.00	
SAFE shares less principal / price	0.00	
Seed proceeds less target	0.00	
Input status	Valid	Do not use results if the input status is not Valid.

Existing holders, the share tranche and SAFE investors all bear the new option-pool dilution. Different signed capitalization definitions may change the outcome.

No new grants, warrants, other convertibles, anti-dilution adjustments or pro-rata reinvestments are assumed. Confirm these before finalizing a financing.

4orm Finance — financing schedule

Target dates only. Don’s historical payment is excluded from new cash and from the C\$2.5M fundraising target.

Closing target	New cash	Instrument / status	
	Oct-26	\$500,000	Share subscription at 50¢. Unallocated investor group.
	Nov-26	\$1,000,000	First half of the SAFE portion. Same provisional cap and discount.
	Dec-26	\$1,000,000	Remaining SAFE portion. Same provisional cap and discount.
TOTAL NEW PRE-SEED		\$2,500,000	
Historical payment — Don		\$50,000	Already paid. Not new money; not assumed to remain in the bank.
Seed opening	Q3–Q4 2027		Open when customer results support the financing.
Seed close — planning date		Dec-27	Delay case in operating plan: March 2028.
Seed target		\$5,000,000	
Pre-seed proceeds reconciliation		0.00	

No named investor is assumed committed to the first tranche or SAFE portion. Funding must close before dependent spending is committed.
