

# 4orm Finance — pre-seed

Canadian dollars. Planning assumptions as at 28 September 2026.

| Case                          | Target      |                                                                                           |
|-------------------------------|-------------|-------------------------------------------------------------------------------------------|
| THE FUNDING                   |             |                                                                                           |
| Pre-seed base target          | \$2,500,000 | Open October 2026; target full close December 2026.                                       |
| First close                   | \$500,000   | October 2026. Spending starts when funding arrives.                                       |
| Second close                  | \$1,000,000 | November 2026; January 2027 in Delay.                                                     |
| Final close                   | \$1,000,000 | December 2026; February 2027 in Delay.                                                    |
| Opening cash                  | —           | Replace with the verified available bank balance.                                         |
| Next raise                    | \$5,000,000 | Provisional seed. Open Q3–Q4 2027.                                                        |
| Seed close                    | Dec-27      | December 2027; March 2028 in Delay. No seed in Survival.                                  |
| Optional maximum              | \$3,000,000 | Accept up to this amount if demand and terms justify it. Not included in forecast cash.   |
| WHERE THE PRE-SEED GOES       |             |                                                                                           |
| People and advisors           | \$1,005,000 | Named fees, two salespeople and one client relations manager. No general advisory pool.   |
| Speer — build and maintenance | \$460,000   | Development and routine testing through Speer. Maintenance allowance begins January 2028. |
| Reaching customers            | \$136,000   | Discovery, demonstrations, pilots and customer marketing.                                 |
| Running the company           | \$180,000   | Hosting, tools, bookkeeping, insurance and administration.                                |

|                                 |                    |                                                                                                           |
|---------------------------------|--------------------|-----------------------------------------------------------------------------------------------------------|
| Legal and security              | \$190,000          | Contracts, privacy, independent security testing and ongoing advice.                                      |
| Bridge repayment                | \$30,000           | \$30K principal allowance. Confirm the payable balance and date.                                          |
| <b>18-month spending</b>        | <b>\$2,001,000</b> | <b>October 2026–March 2028. Core scope, before expansion hires.</b>                                       |
| Cost contingency — 15%          | \$300,150          | Allowance for costs coming in higher.                                                                     |
| 18 months with contingency      | \$2,301,150        | Core scope, including the full cost contingency. No customer receipts, grants or seed required.           |
| <b>Remaining runway reserve</b> | <b>\$198,850</b>   | <b>Available after the 18-month budget and cost contingency.</b>                                          |
| <b>Extra months covered</b>     | <b>1.6</b>         | <b>Reserve divided by April 2028 core monthly costs, including 15%. Approximately 20 months in total.</b> |

Pursue paid discovery and non-dilutive funding. Neither is required to fund the core runway.

## WHAT THIS ROUND NEEDS TO ACHIEVE

|            |                                                                                         |
|------------|-----------------------------------------------------------------------------------------|
| Q4 2026    | Close funding, confirm Speer scope, recruit the first seller and pursue paid discovery. |
| Q1 2027    | Build the mortgage workflow; prepare customer onboarding.                               |
| Q2 2027    | Launch controlled pilots and convert the first paying customers.                        |
| Q3 2027    | Add the second seller; show repeat use, customer references and delivery costs.         |
| Q3–Q4 2027 | Open seed when customer results and the delivery plan support it.                       |

Management target: \$94.7M annual revenue in 2031. Expansion follows customer demand; Speer supplies development capacity.

Speer prices and new-hire allowances require agreements. Share and SAFE terms are planning assumptions. Forecast cash excludes income tax.

## PLANNING INPUTS

|                                     |          |                                                                            |
|-------------------------------------|----------|----------------------------------------------------------------------------|
| Forecast starts                     | Oct-26   | Fixed October 2026 anchor.                                                 |
| Paid delivery starts                | Apr-27   | Target begins April 2027.                                                  |
| Customer collection delay, months   | 2        | Two months after revenue is earned; approximately 60 days.                 |
| Cost contingency                    | 15%      | Applied to the core funding requirement.                                   |
| Delay to paid delivery, months      | 0        | Target 0; Delay 3, moving April to July; Survival has no sales.            |
| Sales volume factor                 | 100%     | Target 100%; Delay 50%; Survival zero.                                     |
| Operating cost increase             | 0%       | Target 0%; Delay and Survival 15%.                                         |
| Core firms won through partners     | 75%      | Unvalidated distribution assumption; reduces direct seller workload.       |
| Annual core wins per salesperson    | 36       | Planning capacity; replace with observed sales performance.                |
| Complex wins per partner seller     | 24       | Enterprise, supervision and API. Separate from core firm sales.            |
| Core firms per client manager       | 150      | Planning capacity; depends on automation and actual support demand.        |
| Complex accounts per client manager | 40       | Additional capacity for enterprise, supervision and API accounts.          |
| Annual customer churn               | 6%       | Unvalidated replacement-sales allowance.                                   |
| Monthly Speer maintenance           | 20,000   | From January 2028. Provisional, not a vendor quote.                        |
| Expansion marketing / revenue       | 15.0%    | From 2028 after seed. Total marketing budget, above the core minimum.      |
| Expansion legal / revenue           | 1.5%     | From 2028 after seed. Total legal/security budget, above the core minimum. |
| Product delivery manager, monthly   | \$10,000 | Planning allowance per additional operating role.                          |
| Operations role, monthly            | \$8,000  | Planning allowance per additional operating role.                          |

## PROPOSED ROUND TERMS

|                                    |              |                                                                          |
|------------------------------------|--------------|--------------------------------------------------------------------------|
| First tranche — price per share    | \$0.50       | C\$500K share subscription. Proposed price.                              |
| SAFE portion                       | \$2,000,000  | Balance of the new C\$2.5M raise.                                        |
| SAFE post-money cap — provisional  | \$15,000,000 | Single cap for modelling; not agreed.                                    |
| SAFE ownership at cap              | 13.33%       | Before seed cash and a new option pool.                                  |
| Shares before new raise            | 20,200,000   | 20M founding allocation plus 200K Don purchased shares; verify register. |
| First tranche — new shares         | 1,000,000    | No named investor commitment assumed.                                    |
| First tranche — implied pre-money  | \$10,100,000 | Applies only to the share tranche.                                       |
| First-tranche ownership after SAFE | 4.09%        | Cap-conversion illustration.                                             |
| Combined new-round ownership       | 17.42%       | Share tranche plus SAFE. Excludes Don, seed cash and a new option pool.  |
| Ownership — optional maximum       | 20.60%       | Assumes all additional money is SAFE at the same cap. Not forecast cash. |
| SAFE discount — draft assumption   | 15.00%       | Not agreed. Lower seed pricing can increase dilution. See capital model. |

|----------------------------------|---|---|---|----|----|----|
| Operating role units at year end | 3 | 5 | 7 | 11 | 17 | 27 |
|----------------------------------|---|---|---|----|----|----|

Operating role units include full-time-equivalent operating contractors. Named advisors and Speer's team are separate. Future hires follow workload assumptions.

2026 covers October–December. Revenue is a management target. Positive-profit years require a tax provision before forecasting distributable cash.

The seed is provisional. Expansion needs customer collections as well as funding; slower sales may require slower hiring or more capital.

# Investor Returns

Canadian dollars. Growth target illustration. Cash distributions and unsold equity shown separately.

| SAFE post-money cap           | C\$15,000,000 | Capital structure model: proposed terms.                  |
| SAFE principal                | C\$2,000,000  | Proposed C\$2M SAFE.                                      |

|                                      |               |                                                           |
|--------------------------------------|---------------|-----------------------------------------------------------|
| Shares before new raise              | 20,200,000    | Founding allocation plus Don purchased shares.            |
| First tranche new shares             | 1,000,000     | First tranche amount divided by subscription price.       |
| Investor shares                      | 200,000       | Investor contribution divided by price per share.         |
| Pre-seed pool fraction               | 12.000%       | Option pool grossed up for seed dilution.                 |
| SAFE conversion value                | C\$15,000,000 | Lower of post-money cap and discounted seed basis.        |
| Shares after SAFE                    | 24,461,538    | Existing and tranche shares, adjusted for SAFE.           |
| Fully diluted post-seed shares       | 33,356,643    | Includes new seed shares and the full option pool.        |
| Investor post-seed ownership         | 0.5996%       | Held constant thereafter; no later dilution assumed.      |
| Illustrative company tax rate        | 27.000%       | Flat rate on positive profits. No loss relief or credits. |
| First pool year                      | 2027          | Illustration starts in 2027. Confirm final terms.         |
| First payout period, years           | 5             | First five-year period: 2027–2031.                        |
| First payout rate                    | 40.000%       | 40% of positive after-tax net profit to investors only.   |
| Second payout period, years          | 5             | Next five-year period: 2032–2036. Profits not forecast.   |
| Second payout rate                   | 20.000%       | 20% to investors only; no future profits invented.        |
| Net cash / debt valuation adjustment | –             | Zero adjustment. Distributions are not counted twice.     |

Annual licence revenue includes core, enterprise, supervision and API. Excludes paid records and services.

Annual licence revenue is an ARR proxy, not verified year-end contracted ARR. Multiples are assumptions.

Profit pool is allocated by invested dollars, not equity. Founders do not participate merely by holding shares.

Terms are proposed. Payments require available cash and approval. No investor tax or transaction costs included.

Ownership assumes the modelled seed closes. Later funding, preference rights and further dilution are excluded.

## CASH AFTER THE PROPOSED PAYMENTS

Tax and distributions are deducted here from the existing pre-tax cash forecast, not from operating expenses.

This annual illustration assumes payment in the year earned. The original monthly cash forecast is unchanged.

#### Sources and assumption basis

Growth, profit and cash: Five Years. Funding, subscription and SAFE terms: The Raise.

Seed valuation and option pool: 4orm Capital Structure model, 28 September 2026. Proposed assumptions.

Contribution, payout rates and multiples: management illustration. These are not promised investor returns.

Tax: illustrative 27% only; actual tax will depend on jurisdiction, deductions, losses and credits.

Federal general rate: [canada.ca/en/revenue-agency/services/tax/businesses/topics/corporations/corporation-tax-rates.html](https://canada.ca/en/revenue-agency/services/tax/businesses/topics/corporations/corporation-tax-rates.html)

BC general rate: [www2.gov.bc.ca/gov/content/taxes/income-taxes/corporate/tax-rates](https://www2.gov.bc.ca/gov/content/taxes/income-taxes/corporate/tax-rates)

2032–2036 uses the proposed 20% rate; add a supported profit forecast before estimating those payments.

## Canadian dollars. Flaring assumptions as at 28 September 2020.

Management targets, not contracts. Core and enterprise populations are separate. Supervision and APR need separately identifiable work

Sources and assumption checks

Checked 28 September 2026. Model amounts are CAD unless stated. A benchmark supports context, not a supplier quote or proof of 40m demand.

Scope: all funding, named team fees, development phases, operating costs, revenue inputs, delivery percentages and staffing assumptions. No forecast values changed.

Read the support level and limitation together. Internal decisions have no external URL. Live pricing can change; published years and currencies are retained.

Annual wage comparisons use 2,080 hours (40 × 52), an illustration before employer costs. Foreign prices are not silently converted or included in the budget.
