What this says	Evidence and context	Source links	PDF page	Topic
Banks should assess whether a product fits the customer.	Financial Consumer Agency of Canada (FCAC; supervises consumer protection at federally regulated financial institutions), Appropriate products. "A Bank should assess the appropriateness of the product or service when it offers or sells it." Customer circumstances and product knowledge must inform the assessment. Applies to entities within the guideline's banking coverage.	R1, source		3 What the regulators are saying
Banks must provide only products and services the customer agrees to receive.	Canada's financial consumer protection agency, Consent. "Banks must ensure that Canadians are only provided with the products and services that they agree to receive." Agreement must relate to the actual product or service.	R2, source		3 What the regulators are saying
Client discovery should involve a meaningful conversation.	Canada's investment-dealer regulator, Meaningful discovery. "a Dealer's process for collecting information should amount to a meaningful interaction with the client." A completed questionnaire alone does not demonstrate a useful discovery process.	R3, source		3 What the regulators are saying
Firms need records showing how they assessed a product's features, costs and risks.	Canada's council of investment regulators and Canada's investment-dealer regulator, Evidence gap. "many firms lacked sufficient documentation to evidence the KYP assessments performed" Here, KYP means knowing the product's features, costs and risks. The firm needs records showing how it assessed the product.	R4, source		3 What the regulators are saying
Insurance advisers should understand customer needs before giving advice.	Canadian insurance regulators' council and Canadian Insurance Services Regulatory Organizations (CISRO; a forum for regulators of insurance agents and brokers), Understand needs first. "Before giving advice, appropriate information should be sought from Customers for assessing their insurance objectives and needs." The consumer's needs should precede the recommendation.	R5, source		3 What the regulators are saying
The quoted rules have different scopes and do not endorse 4orm.	Quotes are short excerpts from the cited texts. These regimes have different scopes. None requires 4orm, endorses its architecture, or transfers professional responsibility to software.	Context / proposal		3 What the regulators are saying
Insurance regulators identified weak monitoring of independent sales channels.	Canadian insurance regulators' council, Supervision. "a lack of insurers' robust monitoring and supervision of independent distribution channels" The January 2026 review connects oversight gaps to the relationship between insurers and the agents or brokers selling their products.	R6, source		4 What the regulators are saying
Success means the consumer understood the information.	Canada's financial consumer protection agency, Understanding. "Communicating in ways people understand means using comprehension or understanding as the measure of success." Measure what the person understood, alongside what was disclosed.	R7, source		4 What the regulators are saying
Consumers should choose which approved providers receive their financial data.	Bank of Canada, Consumer control. "securely share their financial data with approved service providers of their choice" Consent and approved access matter when reusing financial information.	R8, source		4 What the regulators are saying

Mortgage relief should fit the customer's circumstances and needs.	Canada's financial consumer protection agency, Tailored mortgage relief. "Consumers at risk are offered mortgage relief measures that are appropriate to their circumstances, including their financial needs." A discovered difficulty should lead to a practical support path.	R9, source	4 What the regulators are saying
A mortgage that suits one person may not suit another.	Canada's financial consumer protection agency, Individual suitability. "Each mortgage holder's journey is different, and what works for one person may not suit another." Consumer context changes the right comparison and recommendation.	R10, source	4 What the regulators are saying
4orm proposes capturing the consumer's circumstances before assessing options.	Start with the consumer. Capture circumstances, goals, reserves, constraints and unresolved questions; let the professional assess options and document the rationale.	2 source links	4 What the regulators are saying
4orm proposes connecting decisions to retrievable supporting evidence.	Create retrievable evidence. Connect facts, permissions, explanations, options, decisions and later changes. This is a product hypothesis aligned with the findings, not proof of regulatory compliance.	2 source links	4 What the regulators are saying

What this says	Evidence and context	Source links	PDF page	Topic
A review of 105 firms found gaps in customer information and suitability records.	10 December 2025. Proving the product fits the person. Canadian Securities Administrators (CSA; coordinates the provincial and territorial bodies that regulate investments) and Canadian Investment Regulatory Organization (CIRO; oversees investment dealers and trading on Canadian debt and equity markets) reviewed 105 firms and found weaknesses in customer information, product assessment and records showing why recommendations were suitable. The 105 is the number of firms reviewed, not a failure percentage.	R4, source		2 News and market direction
Insurance regulators found weak oversight of brokers and agents.	January 2026. Oversight of brokers and agents. A joint review by Canadian Council of Insurance Regulators (CCIR; brings Canadian insurance regulators together on common issues) identified weak supervision and documentation where insurers sell through brokers and agents. Insurers remain responsible for how those customers are treated.	R6, source		2 News and market direction
Canada's banking framework supports consumer-approved data sharing.	2026. Consumer-controlled financial data sharing. The Bank of Canada (Canada's central bank) framework supports secure sharing of financial information with approved providers chosen by the consumer. This could help 4orm connect to financial systems; 4orm's approval to participate is not established.	R8, source		2 News and market direction
Vanta reported US\$300M in annual recurring revenue and 16,000+ customers.	29 April 2026. Trust software scale. Vanta (software that helps firms check security practices and show customers the evidence) announced US\$300M annual recurring revenue and 16,000+ customers, reaching the milestone nine months after US\$200M. This validates category scale, not 4orm's growth forecast.	G1, source		2 News and market direction
Aveni reported an additional £12M investment in May 2026.	May 2026. Financial-services work process investment. Aveni (software that reviews financial-service conversations and checks customer treatment) reported an additional £12M investment in its June update. This corrects the older deck's wording that placed the raise in June.	G4, source		2 News and market direction
Dominion Lending Centres acquired mortgage-software provider Filogix.	31 July 2026. A mortgage network buys a software provider. The current Filogix (Canadian mortgage software connecting brokers and lenders) site records its acquisition by DLC (Dominion Lending Centres, a Canadian mortgage brokerage network). Ownership of a major broker platform can affect potential partnerships and competition.	G15, source		2 News and market direction
Harvey announced a US\$550M raise at a US\$15.5B valuation.	9 September 2026. Professional work process investment. Harvey (legal and professional work process software) announced a US\$550M raise at a US\$15.5B valuation. The latest financing supersedes the older US\$8B valuation cited in the deck.	G6, source		2 News and market direction
Aveni is expanding reviews across the complete customer case.	10 September 2026. Review the full customer story. Aveni expanded its checks across the complete customer case, including different communication channels, vehicle financing and insurance. Competitors are already connecting information across the customer relationship.	G17, source		2 News and market direction

Drata is adding evidence-backed reviews of outside suppliers.

16 September 2026. Keep evidence behind risk decisions. Drata (software that tracks compliance tasks and keeps supporting records) announced a tool for assessing risks from outside suppliers, emphasizing defensible, evidence-backed decisions. Firms increasingly need supporting records during daily operations.

What this says	Evidence and context	Source links	PDF page	Topic
Canadian residential mortgage debt exceeded C\$2.4T in December 2025.	Over C\$2.4 trillion. Canadian residential mortgage debt in December 2025. This measures financial exposure and the importance of decisions; it is not software spending or 4orm total addressable market.	P5, source		5 Mortgage pressure and affordability
Mortgage arrears rose from 0.21% to 0.24%, remaining historically low.	0.21% → 0.24%. National mortgage arrears of 90+ days increased from October-December 2024 to October-December 2025. Canada Mortgage and Housing Corporation (CMHC; Canada's national housing agency) describes the level as historically low. The evidence does not support "highest defaults ever."	P5, source		5 Mortgage pressure and affordability
A Bank of Canada forecast projected about 15% higher payments for a defined renewal group.	About 15% higher payments, a forecast. The Bank of Canada's 2026 assessment projected this average increase over its next 12 months for the remaining pandemic five-year fixed-payment group, about 12% of outstanding mortgages. Most recent renewers had managed increases.	P1, source		5 Mortgage pressure and affordability
Mortgage research found 20% did not compare lenders and 13% did not know they could negotiate.	20% did not compare lenders; 13% did not know negotiation was possible. Canada's financial consumer protection agency's mortgage research identifies information and comparison gaps; 37% cited their existing banking relationship as a reason for lender choice.	R10, source		5 Mortgage pressure and affordability
The deck records 88% researching rates online and 72% using calculators.	88% researched rates online; 72% used calculators. Canada's national housing agency's 2026 findings recorded in the full investor deck support a preparation step before the application. Respondents considered roughly 2-3 providers.	M, record		5 Mortgage pressure and affordability
Separate studies in the deck identify uncertainty during the homebuying process.	26% reported process uncertainty; 47% of homebuyers cited uncertainty as a concern. These are different populations/questions and should not be combined.	M, record		5 Mortgage pressure and affordability
The deck records 52% buying at their affordability limit and 32% facing unexpected costs.	52% bought the maximum they could afford; 32% had unexpected costs. Canada's national housing agency's 2026 homebuyer findings recorded in the full investor deck support asking about reserves and total ownership costs.	M, record		5 Mortgage pressure and affordability
Self-reported affordability understanding does not establish actual understanding.	79% said they understood affordability. Self-reported understanding is not an objective affordability or comprehension assessment.	M, record		5 Mortgage pressure and affordability
Surveyed payment difficulties are different from measured mortgage arrears.	2025 self-reported payment strain. The master records 51% having difficulty maintaining debt payments, 17% difficulty with mortgage payments and 14% missing a payment. These survey measures are not the national 90-day arrears rate.	M, record		5 Mortgage pressure and affordability
Financial-strain survey responses reveal overlapping pressures on household budgets.	Financial strain, Canada's financial consumer protection agency 2025, as recorded in the deck. 53% struggled financially; 33% borrowed for regular expenses; 26% spent more than income; 50% used savings; 48% lacked emergency savings. Responses overlap and must not be added.	2 source links		6 Consumer circumstances and questions

Saving a down payment took 4.4 years overall in the cited findings.	Time to save a down payment. Canada's national housing agency's 2026: 4.4 years overall and 4.7 for first-time buyers; 28% of first-time buyers used a co-signer other than a spouse. Context for resilience questions, not a default prediction.	M, record	6 Consumer circumstances and questions
The deck reports widespread advice use alongside weaker retirement preparation.	Advice remains relevant. The master reports 76% receiving financial advice in 2024 and retirement preparation among non-retirees falling from 69% in 2019 to 49% in 2024. Original survey methods should accompany external reuse.	M, record	6 Consumer circumstances and questions
Consumers use several overlapping channels to research mortgage options.	Information channels overlap. Canada's national housing agency's 2026: 31% used lender sites, 32% broker sites and 33% comparison sites; 16% of online researchers used digital assistant tools. These are not exclusive shares.	M, record	6 Consumer circumstances and questions
Canada had 14,100 real-estate employer establishments in the cited 2025 data.	14,100 real-estate employer establishments. 2025 industry classification code 5312: offices of real-estate agents and brokers. Establishments are not unique firms, users or qualified buyers.	P2, source	7 Canadian market scale
Canada had 9,722 insurance employer establishments in the cited 2025 data.	9,722 insurance employer establishments. 2025 industry classification code 5242: agencies, brokerages and other insurance-related activities. Budget and product coverage still need qualification.	P3, source	7 Canadian market scale
Canada had 6,480 auto-dealer employer establishments in the cited 2025 data.	6,480 auto-dealer employer establishments. 2025 industry classification code 4411. A possible later group of possible sales partners, not proven mortgage demand.	P4, source	7 Canadian market scale
Federal consumer oversight covered 78 banks and 52 trust and loan companies.	78 banks and 52 trust and loan companies. Canada's financial consumer protection agency's 2024-25 federal oversight group being measured; not the total number of Canadian financial institutions.	R2, source	7 Canadian market scale
The deck records nearly 30M Canadians protected by life and health insurers.	Nearly 30M Canadians protected; 27M with health coverage. CLHIA (Canadian Life and Health Insurance Association) 2025 facts recorded in the full investor deck. Life and health insurers delivered C\$143.3B in benefits and retirement solutions in 2024. Coverage populations overlap.	M, record	7 Canadian market scale
The deck records 1,897,055 new vehicles sold and 3,778 franchised dealerships.	1,897,055 new vehicles; 3,778 franchised dealerships. CADA (Canadian Automobile Dealers Association) 2025 snapshot recorded in the full investor deck, with C\$62.9M average dealership sales. Dealership sales are not work process-software revenue.	M, record	7 Canadian market scale
The deck records 470,314 Canadian residential property sales in 2025.	470,314 residential Multiple Listing Service, the shared property-listing system sales. CREA (Canadian Real Estate Association) 2025 national transaction count in the master. A transaction denominator, not 470,314 paying software customers.	M, record	7 Canadian market scale
The deck records 544M trades worth C\$5.387T under the investment regulator's market context.	245 dealer members; 544M trades worth C\$5.387T. Canada's investment-dealer regulator's financial year 2025 market context recorded in the full investor deck. Trading value is not an addressable software budget.	M, record	7 Canadian market scale
The deck records 22.5B Canadian payments worth C\$12.2T in 2024.	22.5B payments worth C\$12.2T; 86% digital. Payments Canada (the organization operating Canada's core payment clearing and settlement systems) 2024 figures recorded in the full investor deck. These show connected-data scale; they should not be converted directly into record fees.	M, record	7 Canadian market scale

Market populations overlap and must not be added together.	Do not sum these populations. One firm may operate several establishments, and the same consumer may appear across multiple financial sectors.	Context / proposal	7 Canadian market scale
The cited insurance survey found gaps in policy and exclusion knowledge.	Insurance understanding. Ratehub (a Canadian financial-product comparison platform)'s 2025 findings in the master: more than 20% reported weak policy knowledge; over one-third were uncertain about exclusions or had not checked them. Survey evidence, not a measured claim-denial rate.	M, record	8 Canadian gaps beyond mortgages
The cited car-shopping research found 82% researched online.	Digital car shopping. TRADER (a Canadian automotive marketplace and dealer-technology business) July-September 2025: 82% researched online; 9 in 10 were open to a partly online journey and 6 in 10 to a fully online purchase. Used-car research included marketplaces 50%, dealers 40% and manufacturers 40%, with overlap.	M, record	8 Canadian gaps beyond mortgages
Tariff-affected shoppers reported delays, smaller budgets and more comparison.	Price pressure affects decisions. Among tariff-affected auto shoppers in the cited research, 33% delayed, 31% lowered budgets and 33% compared more. These are stated reactions in that group.	M, record	8 Canadian gaps beyond mortgages
The cited investor research found 53% used social media for investing information.	Investment information is fragmented. Canada's council of investment regulators 2024 Investor Index figures in the master: 53% used social media for investing information, rising to 82% among 18-24-year-olds; 46% of Canadians encountered investing information socially. Denominators differ.	M, record	8 Canadian gaps beyond mortgages
The deck records more self-directed investing alongside continued adviser use.	More self-directed participation. The master records 45% self-directed investors, with 30% of that group opening accounts within two years; 61% used an adviser, down 8 percentage points from 2020. Groups can overlap.	M, record	8 Canadian gaps beyond mortgages
Confidence in investment objectives can remain low despite access to information.	Trust and confidence are not the same. Canada's investment-dealer regulator 2024 research in the master: 28% used alternative information; among those users 44% rated it equally valuable and 12% more valuable. Only 21% were very confident about investment objectives.	M, record	8 Canadian gaps beyond mortgages
The cited survey found 55% considered human financial advice crucial.	Human advice still matters. IG/Ipsos (IG Wealth Management, a financial advice firm, and Ipsos, a research company) 2025: 55% said human advice was crucial, as cited in the master. It supports professional involvement rather than a fully automated suitability claim.	M, record	8 Canadian gaps beyond mortgages
The cited stablecoin survey found only 21% could correctly define the product.	Stablecoin knowledge gap. Canada's financial consumer protection agency survey figures in the master: 21% correctly defined the product; 18% met the knowledge measure; roughly half self-estimated knowledge. 4% currently owned and 5% formerly owned; 32% of never-owners considered buying.	M, record	8 Canadian gaps beyond mortgages
The cited investor research found 23% encountered possible fraudulent opportunities.	Fraud exposure. Canada's council of investment regulators 2024: 23% reported possible fraudulent opportunities. The master also cites Finance Canada (the federal Department of Finance): crypto was involved in 60% of C\$310M reported investment-fraud losses in 2023. Neither measures recoverable 4orm revenue.	M, record	8 Canadian gaps beyond mortgages
Federal consumer-protection work produced C\$38M+ in reimbursements.	C\$38M+ reimbursed across 745,000+ accounts. Canada's financial consumer protection agency's 2024-25 work produced reimbursements for consumer and business accounts. This is broad banking correcting problems and compensating customers, not mortgage-only harm.	R2, source	9 Money, complaints and customer compensation

Financial institutions contacted 95,000+ at-risk mortgage holders.	95,000+ at-risk mortgage holders contacted. By 31 March 2025, institutions had proactively contacted this group being measured, as reported by Canada's financial consumer protection agency.	R2, source	9 Money, complaints and customer compensation
Mortgage relief included 15,000+ measures and C\$6M+ in avoided charges.	15,000+ mortgage relief measures; C\$6M+ in avoided charges. Canada's financial consumer protection agency reports relief measures and avoided penalties or fees. Measures are not necessarily unique households.	R2, source	9 Money, complaints and customer compensation
The deck records 26,000+ inquiries to Canada's banking and investment ombudsman.	26,000+ inquiries and roughly 6,200 investigations/cases. Ombudsman for Banking Services and Investments (OBSI; independently resolves eligible customer disputes with participating financial firms) 2025 figures recorded in the full investor deck indicate complaint workload. Service and suitability appear in the cited investment concerns. The inquiry and investigation counts are different measures.	M, record	9 Money, complaints and customer compensation
The deck records 1,345 complaints to Canada's investment-dealer regulator.	Canada's investment-dealer regulator complaint workload. The master records 1,345 complaints and 3,889 inquiries for the cited 2025 reporting period. These are not all proven violations.	M, record	9 Money, complaints and customer compensation
The deck records C\$10.37M in assessed investment-regulator fines.	C\$10.37M in Canada's investment-dealer regulator fines. The master's financial year 2026 figures combine C\$6.27M for individuals and C\$4.1M for firms. Fines assessed are not necessarily collected.	M, record	9 Money, complaints and customer compensation
The deck records C\$20.7M in securities fines and C\$59.4M in repayment-related orders.	Canada's council of investment regulators 2025-26 enforcement. The master cites C\$20.7M in fines and C\$59.4M in restitution, compensation and repayment of improperly obtained gains ordered; 763 website alerts and 11,728 deactivated sites. Orders and alerts are different from realized consumer recoveries.	M, record	9 Money, complaints and customer compensation
Complaints and missing records create staff work that 4orm would need to quantify.	Business costs behind the numbers. Complaint rebuilding the history of a transaction, missing evidence, file rework, supervision and follow-up consume staff time. The national numbers show exposure; they do not quantify 4orm's avoidable share.	2 source links	9 Money, complaints and customer compensation

Canadian customer case studies

What this says	Evidence and context	Source links	PDF page	Topic
KBH reported saving one hour per employee per day during tax season.	KBH (a Canadian accounting firm) + Docusign (electronic signature and agreement-management software), 1 hour per employee per day. During the 2020 tax season, staff reported this saving, 30,000 printed pages avoided and about 1,100 clients signing digitally. Seasonal performance should not be annualized across a full year.	K1, source		10 Canadian cases, time and integration
KBH said it completed tax returns on time without excessive overtime.	Elizabeth Garbuzov, KBH. "we finished everyone's tax returns on time without working crazy overtime" This is direct qualitative evidence of reduced staff strain.	K1, source		10 Canadian cases, time and integration
Wealthsimple reported onboarding thousands of clients daily in minutes.	Wealthsimple (a Canadian investing and financial-services platform) + Flinks (financial-data connectivity and verification supporting technology), thousands onboarded daily, in minutes. Bank-connected data supported identity checks, account authentication and fraud detection. No before-and-after fraud-loss or cost figure was published in the case.	K2, source		10 Canadian cases, time and integration
Wealthsimple credited Flinks with fast onboarding at scale.	Laura Lampe, Wealthsimple. "With Flinks we're able to onboard thousands of clients daily in a matter of minutes" Customer testimony supports scale and convenience.	K2, source		10 Canadian cases, time and integration
EQ Bank described easier mortgage-document collection and review with Flinks.	EQ Bank (a Canadian digital banking brand of Equitable Bank) + Flinks, simpler mortgage documents. The case describes faster collection and review of bank statements, income and source-of-funds information, transferred to the bank's repository. The saving is qualitative.	K3, source		10 Canadian cases, time and integration
EQ Bank said the connected process made things easier for clients.	Paul von Martels, EQ Bank. "It has made things a lot easier for our clients." There is no published percentage improvement in affordability or defaults in the case.	K3, source		10 Canadian cases, time and integration
Cornerstone reported cutting some processing from 120 minutes to as little as 5.	Cornerstone Insurance (a Canadian insurance brokerage) + Applied (Applied Systems, insurance brokerage-management software), 120 minutes to as little as 5. Small-commercial processing improved in the customer case recorded in the full investor deck. This is a best-case process figure, not an average for every insurance transaction.	M, record		10 Canadian cases, time and integration
BrokerTeam and Ogilvy described less repeated administration with Applied.	BrokerTeam (a Canadian insurance brokerage) and Ogilvy (a Canadian insurance brokerage in the Applied customer case) + Applied, less repeated administration. Both cases describe centralized data, carrier feeds and document capture, freeing staff for personalized service. No quantified saving was retained.	M, record		10 Canadian cases, time and integration
Wawanesa's early digital proof-of-insurance launch reported 100+ daily signups.	Wawanesa (a Canadian insurer) + CSIO (Centre for Study of Insurance Operations, an insurance data-standards organization), 100+ daily signups. The early My Proof of Insurance launch reported this adoption with broker visibility into delivery. Adoption is different from hours saved.	M, record		10 Canadian cases, time and integration

Desjardins reported lower expenses, more online sales and stronger customer loyalty.	Desjardins (a Canadian financial cooperative group) + Bain (a management consulting firm), customer recommendation score up 11 points. Expenses fell more than 10% over four years; online-initiated sales rose from 25% to roughly 40%. These were outcomes of a broad transformation, not one software feature.	K4, source	11 Canadian cases, money, adoption and trust
Desjardins described its online experience as a driver of member loyalty.	Nathalie Larue, Desjardins. "Our online experience is a major driver of members' loyalty." This connects service quality to relationship value.	K4, source	11 Canadian cases, money, adoption and trust
Financeit reported 70% bank-link adoption in one retailer's financing programme.	Financeit (a Canadian at-the-time-of-purchase consumer financing platform) + Flinks, 70% bank-link adoption. In one major retailer's direct-to-consumer financing programme, borrowers linked accounts for recurring payments instead of uploading void cheques. This is adoption, not a 70% sales increase.	K5, source	11 Canadian cases, money, adoption and trust
Rifco associated faster verification with approximately 10% more reported income.	Rifco (a Canadian auto-finance company) + Flinks, approximately 10% more reported income. Management associated faster verification and more application-processing volume with the increase. The case does not isolate the software contribution or clearly define the income metric and period.	K6, source	11 Canadian cases, money, adoption and trust
Lepelco reported 62% personal-lines and 91% commercial portal adoption.	Lepelco (a Canadian insurance brokerage) + Applied, 62% and 91% portal adoption. Personal-lines and commercial adoption, respectively; 150% premium growth during the case period. Growth was associated with the transformation, not proven to be caused by the portal alone.	M, record	11 Canadian cases, money, adoption and trust
KOHO reported 2.5M+ Canadians and a credit-score gain for a defined customer group.	KOHO (a Canadian spending, saving and credit-building platform), consumer uptake and a defined credit-building result. The current site reports 2.5M+ Canadians and a +93-point average for a selected group starting at a 440 score, using all three credit tools for 18+ months with on-time payments. This is not a universal or guaranteed outcome.	G14, source	11 Canadian cases, money, adoption and trust
Wealthsimple reported 3.6M clients and C\$155.6B in client assets.	Wealthsimple, growth in a consumer-led platform. Power Corporation (a Canadian financial-services holding company)'s April-June 2026 report confirms 3.6M clients excluding tax filers, C\$155.6B in assets under administration and approximately C\$17B in quarterly new customer money received minus money withdrawn. Assets and inflows are not company revenue.	P6, source	11 Canadian cases, money, adoption and trust
The Canadian cases support digital adoption; 4orm must still prove its own results.	What this supports. Consumers adopt useful digital preparation, data sharing and self-service. Businesses can gain capacity and stronger relationships. 4orm still needs to measure adoption, comprehension, keeping customers and paid demand in its own work process.	D, record	11 Canadian cases, money, adoption and trust

Time, cost and staff savings

What this says	Evidence and context	Source links	PDF page	Topic
Santander UK cut average business-account opening from 12 days to 2.	Santander UK (a UK bank) + Docusign, 12 days to 2 days. Average business-account opening became 83% faster; 39 signup and setup PDFs became one dynamic form, a 97% reduction. This is business banking, not mortgage suitability.	K7, source		12 Global cases, faster work and fewer steps
Vestwell cut agreement preparation from 75 minutes to 5.	Vestwell (a workplace savings and retirement platform) + Docusign, 75 minutes to 5 minutes. Agreement preparation fell sharply; the initial customer implementation saved about 200 staff hours monthly. Embedded down payments also reduced post-signature drop-offs by 70%. United States.	K8, source		12 Global cases, faster work and fewer steps
Trustmark reported service turnaround three days faster.	Trustmark (a US bank) + Docusign, 3 days faster. The bank reported faster service turnaround and 97% completion, with more than half completed on the day of sending. United States.	K9, source		12 Global cases, faster work and fewer steps
FineMark cut trust-packet preparation from 4-5 hours to 30 minutes.	FineMark (a US private banking and trust business) + Docusign, 4-5 hours to 30 minutes. Trust-packet preparation involving up to 45 documents became much faster; the case reports a 90% time reduction. United States.	K10, source		12 Global cases, faster work and fewer steps
First Citizens reported completing high-value legal agreements in under an hour.	First Citizens (a US bank) + Docusign, under one hour. High-value legal agreements could be generated, executed and stored in less than an hour. The cited case does not provide a comparable starting measurement. United States.	K11, source		12 Global cases, faster work and fewer steps
Key Group cut quality-review time from 90 minutes to 15.	Key Group (a UK later-life lending and advice group) + Aveni, 90 minutes to 15 minutes. Quality-assurance review was about 83% faster, equivalent to six reviews in the former time for one if other constraints are unchanged. United Kingdom.	K16, source		12 Global cases, faster work and fewer steps
Prosser Knowles cut administration from two hours to 45 minutes.	Prosser Knowles (a UK financial planning firm) + Aveni, 2 hours to 45 minutes. Approximately 60% less administration, with report turnaround moving from 4-6 weeks to same-day or next-day in the case. United Kingdom.	K17, source		12 Global cases, faster work and fewer steps
Octopus Money reported 50% less review time while expanding coverage.	Octopus Money (a UK financial advice and coaching business) + Aveni, 50% less review time. Coverage expanded from 10-15% toward all interactions across about 60 advisers and coaches. More coverage is distinct from proven improvement in consumer outcomes. United Kingdom.	K18, source		12 Global cases, faster work and fewer steps
Zello reported 700+ hours saved annually, valued at \$70,000+.	Zello + Drata, 700+ hours and \$70,000+ annually. The case values time saved and reports 234 checks and safeguards. The source's dollar denomination was not established in the retained report; no currency exchange calculation is made here.	K20, source		14 Global cases, money and resources
MyOutDesk reported capacity equivalent to about three roles.	MyOutDesk (a virtual-assistant services business) + Drata, capacity comparable to about three roles. This is a reported workload-equivalent benefit, not proof of three layoffs or cash payroll savings.	K22, source		14 Global cases, money and resources
Jellyfish reported saving two to three hours each week.	Jellyfish (engineering management software) + Drata, 2-3 hours saved weekly. Faster evidence handling included document access in seconds. Capacity and retrieval benefits should be measured separately.	K23, source		14 Global cases, money and resources

Snowflake reported saving 2,000+ hours annually through self-service trust information.	Snowflake (a cloud data platform) + Vanta, 2,000+ hours annually. Self-service trust information reduced repeated security-review work. The case supports a shared evidence-access mechanism.	K24, source	14 Global cases, money and resources
Perforce reduced compliance work from 60% to 15% of team time.	Perforce (enterprise software development tools) + Vanta, 60% to 15% of team time on compliance. The case reports a 75% reduction in that labour burden and 60% less questionnaire work. Reallocated time is not automatically an equal cash saving.	K26, source	14 Global cases, money and resources
Duolingo reported a programme manager saving up to 12 hours weekly.	Duolingo (a language-learning platform) + Vanta, up to 12 hours weekly. A programme manager's reported saving; the case also describes avoided service and hiring costs in the hundreds of thousands without a single precise, comparable cash figure.	K27, source	14 Global cases, money and resources
Consumers Credit Union reported five dollars of avoided fraud loss per software dollar.	Consumers Credit Union (a US credit union) + Alloy (identity verification and fraud-risk decision-making software), five dollars of avoided fraud loss per software dollar. The customer describes an economic return from fraud prevention. The benefit being counted is avoided loss, not revenue.	K32, source	14 Global cases, money and resources
Recordsure's cost and selling-time headlines lack a named case in the retained evidence.	Recordsure (financial-services interaction review and customer-results monitoring software), lower-evidence vendor headline. The prior materials cite 50% lower costs and 35% more selling time without a named customer implementation or complete measurement basis. Retained for completeness; do not use as a proven customer result.	2 source links	14 Global cases, money and resources
Released staff capacity and cash savings are different benefits.	Separate the benefits. Released capacity, avoided future hiring, reduced overtime, reduced external spend, faster cash collection and lower realized loss are different outcomes. Count only benefits evidenced in the paying firm's starting measurement and pilot.	D, record	14 Global cases, money and resources

Sales and customer retention

What this says	Evidence and context	Source links	PDF page	Topic
FirstBank reported 20% higher loan-officer productivity.	FirstBank (a US bank in the Total Expert mortgage case) + Total Expert (customer engagement and marketing software for financial services), 20% more loan-officer productivity. The customer result recorded in the full investor deck supports work process and follow-up efficiency. United States; vendor-published.	M, record		13 Global cases, sales and keeping customers
Prosperity reported US\$141M in additional funded loans, not company revenue.	Prosperity Home Mortgage (a US mortgage lender) + Total Expert, US\$141M in additional funded loans. The six-month case identified 27,904 opportunities from 591,000 contacts. Funded loan principal is not revenue or profit. United States.	M, record		13 Global cases, sales and keeping customers
U.S. Bank reported 40% of pre-applicants completed an application.	U.S. Bank (a US bank) + Blend (digital banking and mortgage-origination software), 80,000 affordability-tool users. 40% of pre-applicants completed an application. This is a completion rate at that step, not a 40% increase in the share of people who become customers.	M, record		13 Global cases, sales and keeping customers
Compass Mortgage increased online applications from about 10% to over 50%.	Compass Mortgage (a US mortgage lender) + Blend, online applications from about 10% to over 50%. The case also reports roughly 95% fewer support tickets and a 20% improvement in file quality. United States.	M, record		13 Global cases, sales and keeping customers
Clark Knapp reported a 15% higher share of sales opportunities closing.	Clark Knapp (a US automotive dealership business) + Cox (Cox Automotive, automotive retail and dealer technology), 15% higher share of sales opportunities that closed. The case reports a faster digital-retail journey, with some in-store completion in around 30 minutes. A separate vehicle financing and insurance profit improvement was qualitative in the retained material. United States.	M, record		13 Global cases, sales and keeping customers
BT Business reported customer loss falling by six percentage points.	BT Business (a UK business communications provider) + Pega (business work process and customer-decision-making software), 6 percentage points less customer loss. The case also reports 1.9% more contract renewals and doubled the share of prospects becoming customers in a targeted mobile campaign. The results use different measures and populations. United Kingdom.	K15, source		13 Global cases, sales and keeping customers
GitLab reported sales cycles 10-14 days shorter and fewer security questionnaires.	GitLab (a software development platform) + SafeBase (trust-centre and security-review software within Drata) / Drata, 10-14 days off sales cycles. The case reports 50% fewer security questionnaires year over year. Buyer-accessible evidence can reduce repeated trust reviews. Global software business.	K21, source		13 Global cases, sales and keeping customers
Clay reported 20% shorter deal cycles after a joint compliance implementation.	Clay (sales research and customer-data work process software) + Vanta / Workstreet (a compliance implementation and support provider), 20% shorter deal cycles. A joint compliance and trust implementation supported commercial speed. Do not attribute the whole effect to a single feature. United States.	K28, source		13 Global cases, sales and keeping customers
Zello reported sales cycles three to 14 days shorter.	Zello (a voice communications platform) + Drata, sales cycles 3-14 days shorter. Faster evidence response complemented the cost and control benefits described in the case. United States.	K20, source		13 Global cases, sales and keeping customers

Reporting, audit, integration and risk

What this says	Evidence and context	Source links	PDF page	Topic
Bancolombia cut data collection from 79 days to 34.	Bancolombia (a Colombian banking group) + Workiva (financial reporting, audit and compliance software), 79 days to 34 days. A 57% reduction in data-collection time; 360 hours saved for the 2024 annual US securities filing (Form 20-F) work. Colombia.	K13, source		15 Global cases, reporting and audit
Mineros cut its financial-statement cycle from one month to one week.	Mineros (a gold-mining company) + Workiva, one month to one week. A 75% reduction in the financial-statement cycle in the February 2026 case, with ready for an independent review information. Colombia / international mining.	K14, source		15 Global cases, reporting and audit
Connective cut security-audit preparation from 4-5 months to five weeks.	Connective (the business in Drata's security audit case) + Drata, 4-5 months to 5 weeks. The customer case reports faster preparation for a SOC 2 examination. This reviews a service provider's controls, such as security; it does not establish that a financial product is suitable for a consumer.	K19, source		15 Global cases, reporting and audit
GitHub reported automating 93% of security-questionnaire work.	GitHub (a software development and collaboration platform) + Vanta, 93% questionnaire automation. Reported within six months, reducing repetitive security-answer work. This is automation coverage, not 93% fewer all-company costs.	K25, source		15 Global cases, reporting and audit
Samsara reported 50% faster vendor reviews.	Samsara (connected-operations software) + Vanta, 50% faster vendor reviews. The company update also describes combining overlapping checks from about 820 checks and safeguards across 10 sets of requirements to roughly 260. Counts reflect mapped checks and safeguards, not eliminated legal obligations.	G1, source		15 Global cases, reporting and audit
Octopus Money expanded review from a 10-15% sample toward all interactions.	Octopus Money + Aveni, broader review coverage. Near-complete interaction review, versus a 10-15% sample before, offers a different supervisory model. Its 50% time saving is reported in the time category.	K18, source		15 Global cases, reporting and audit
BNP Paribas built a reusable record of customer checks across the bank.	BNP Paribas (an international banking group) + Fenargo (software for checking clients and managing financial-crime compliance), reuse customer information. The One KYC programme creates a reusable record of customer checks. Launched in July 2021 and recognized in Celent (a financial-services technology research firm)'s 2022 awards, it illustrates information sharing across a large bank. The retained case summary did not quantify savings.	K12, source		15 Global cases, reporting and audit
Retrievable records can support audits, complaints and management reporting.	Why firms may pay. Complete records, consistent source information, easier review of unusual cases and fast document retrieval can support audits, complaints and management reports. The examples show how this can work. 4orm must prove extra value beyond a firm's existing tools.	2 source links		15 Global cases, reporting and audit
Raise reported 98% less manual review with Sardine.	Raise (a gift-card marketplace) + Sardine (fraud prevention and financial-crime risk software), 98% less manual review. Vendor-published customer result from the global case-study index. This supports automatically identifying cases that need review, not elimination of all compliance work.	K29, source		16 Global cases, integration and risk

Prezzee reported approval rates up to 70% higher with Sardine.	Prezzee (a digital gift-card platform) + Sardine, up to 70% higher approval rates. The index also reports card fraud 50% below the industry average. That comparison is not a 50% before-and-after fraud reduction.	K29, source	16 Global cases, integration and risk
Novo reported 90% fewer card-dispute payment reversals with Sardine.	Novo (a small-business banking platform) + Sardine, 90% fewer payments reversed after a card dispute. Reported in the vendor's customer index. Definition, starting measurement and implementation period should accompany reuse as a headline.	K29, source	16 Global cases, integration and risk
IncredibleBank reported automating 90% of account openings.	IncredibleBank (a US bank) + Alloy, 90% of openings automated. The case also reports 90% less manual review. These related measures should not be added as separate savings. United States.	K30, source	16 Global cases, integration and risk
Suncoast reported 35% lower fraud losses and higher digital membership completion.	Suncoast Credit Union (a US credit union) + Alloy, 35% lower fraud losses. Digital membership completion increased 17% from 2024 to 2025; 98% of login decisions were automated. These are different work process stages. United States.	K31, source	16 Global cases, integration and risk
Suncoast's case records 269M logins and 103,000 digital products opened.	Suncoast, large operating scale. The case records 269M logins in 2024 and 103,000 digital products opened. A future target of 2.5M members by 2030 is a goal, not achieved growth.	K31, source	16 Global cases, integration and risk
Consumers Credit Union reported automating 78% of onboarding.	Consumers Credit Union + Alloy, 78% signup and setup automated. Policy changes became 96% faster; the case also reports the avoided-fraud-loss return described in the money category. United States.	K32, source	16 Global cases, integration and risk
Earnest increased approvals from 45% to over 70%.	Earnest (a US education-finance company) + Alloy, approvals from 45% to over 70%. About 56% relative improvement, rather than 56 percentage points. Policy changes fell from 4-6 weeks to 3-6 days, reported as 89% faster. United States.	K33, source	16 Global cases, integration and risk
4orm's integration proposal combines approved data reuse with professional review.	Integration lesson for 4orm. Use consumer-approved data, reuse verified facts and send exceptions to professionals. More approvals are valuable only when the resulting product and risk decision remain appropriate.	2 source links	16 Global cases, integration and risk

Consumer understanding and support

Select a blue source link. Entries with several sources open the full supporting list.

What this says	Evidence and context	Source links	PDF page	Topic
Ask what remains in the household budget if mortgage payments rise.	Payment shock. "If your payment rose to the amount shown, what would remain each month after taxes, insurance, utilities, maintenance and other debt payments?" Use the person's actual terms and a clearly labelled scenario.	V, record		6 Consumer circumstances and questions
Ask how long savings would cover payments after an income interruption.	Income interruption. "If your household income stopped or fell for three months, what payments could your remaining savings cover?" Separate savings after closing from the down payment.	V, record		6 Consumer circumstances and questions
Ask about future life changes, other debts and the cost of leaving the product.	Future fit. Ask about dependants, leave, relocation, retirement, renovations, other debts, exit penalties and the time horizon. Check missing or conflicting information before recommendation.	D, record		6 Consumer circumstances and questions
A professional can address gaps through price, structure, reserves or timing.	Resolve the gap. A professional can compare a lower purchase price, different eligible structure, stronger reserves or a later timeline, explain trade-offs and document why the selected option fits.	V, record		6 Consumer circumstances and questions
The proposed scenarios do not establish that 4orm prevents defaults.	The scenarios are education and discovery tools. Rates, income shocks and other factors can contribute to stress, but the reviewed evidence does not quantify every cause of default or show that 4orm prevents defaults.	Context / proposal		6 Consumer circumstances and questions
Connected information can reduce repeated paperwork and document collection.	Less repeated paperwork. EQ Bank / Flinks and Santander / Docusign show how connected information can reduce document gathering, re-entry and branch or postal steps. Their customer cases support convenience.	2 source links		17 Consumer trust, effort and emotional burden
Faster onboarding can reduce waiting, but does not prove better suitability.	Faster access to an answer. Wealthsimple's signup and setup and the banking agreement cases show shorter waiting and fewer process steps. Faster completion alone does not prove a better financial decision.	3 source links		17 Consumer trust, effort and emotional burden
Desjardins' customer recommendation score improved by 11 points.	Relationship quality. Desjardins' 11-point improvement in Net Promoter Score measures customers' willingness to recommend the business. It came from a wider business transformation and is the strongest quantified Canadian loyalty example in this collection.	K4, source		17 Consumer trust, effort and emotional burden
KBH's overtime testimony supports reduced strain without quantifying mental-health outcomes.	Less employee strain. KBH's overtime testimony is qualitative evidence of relief. It does not quantify burnout, turnover or mental-health outcomes.	K1, source		17 Consumer trust, effort and emotional burden
Mineros described greater reporting confidence and an easier audit process.	Confidence in reporting. Mineros' case links connected financial reporting to more confidence and an easier audit process. This is operational testimony, not a clinical measure of stress.	K14, source		17 Consumer trust, effort and emotional burden
Separate auto-finance measures report about 30 or 38 minutes saved.	Fewer in-store steps. Cox's 2021 US financing-journey research, recorded in the full investor deck, reports roughly 30 minutes saved by online finance applications and 38 minutes by online paperwork. These are separate measures, not a combined 68-minute promise.	M, record		17 Consumer trust, effort and emotional burden
4orm should test whether consumers understand costs, risks and alternatives.	Consumer understanding. Canada's financial consumer protection agency explicitly treats comprehension as the success measure. 4orm should test whether users understand payments, costs, risks, alternatives and trade-offs after the experience.	R7, source		17 Consumer trust, effort and emotional burden

4orm proposes consumer control over sharing, correction and export.	Consent and control. The product proposal includes consumer-approved sharing, correction, export and withdrawal of future sharing, while applicable record-keeping duties still require separate treatment.	D, record	17 Consumer trust, effort and emotional burden
4orm has not yet established measured improvements in trust, defaults or complaints.	Still unproven for 4orm. Reduced anxiety, improved trust, lower defaults, fewer complaints, better customer retention and fewer unsuitable sales require direct measurement. No percentage improvement in those outcomes is established by the reviewed material.	D, record	17 Consumer trust, effort and emotional burden

Interviews and competitive positioning

Select a blue source link. Entries with several sources open the full supporting list.

What this says	Evidence and context	Source links	PDF page	Topic
An Ali AbouDaya interview summary records C\$250-300K in annual compliance spending.	Ali AbouDaya, Transactix / CADX (the payments and digital-currency business discussed in founder discovery). The August 4 conversation, summarized in the September 7 discovery materials, records C\$250-300K in annual external compliance-set of tools and services spending and C\$25-50K as a potential software budget. These are management-synthesized interview figures, not audited spending or a purchase order.	V, record		18 Interviews, budgets and business pain
An ATB discovery summary includes a C\$100K annual attestation example.	Aly Kassam, ATB (an Alberta financial institution) discovery conversation. The supplied synthesis includes an approximately C\$100K annual attestation example. It is not verified ATB procurement or an ATB commitment. The original transcript was not recovered; no verbatim quote is asserted.	2 source links		18 Interviews, budgets and business pain
A Century 21 practitioner described moving information through roughly 10 applications.	Century 21 (a real-estate brokerage network) practitioner, 21 years of experience. Discovery describes entering information once and moving it through roughly 10 applications, with completeness checks and notifications. It also raises the question of whether the brokerage or individual agent pays.	M, record		18 Interviews, budgets and business pain
The eXp discussion showed that existing systems already capture communications.	eXp (a real-estate brokerage network) discussion, communication is already captured. Existing software for managing customer relationships communication records are a starting measurement. 4orm needs to show additional context, comprehension and rationale rather than assume communication capture is missing.	M, record		18 Interviews, budgets and business pain
Kevin's automotive discovery identified repeated credit submissions and friction.	Kevin, automotive vehicle financing and insurance discovery. The notes describe repeated credit submissions, declines and unnecessary friction. Dealer incentives and consumer benefit need to be tested together; there is no quantified reduction from 4orm.	M, record		18 Interviews, budgets and business pain
Hiring, training and turnover costs remain business-pain hypotheses for 4orm.	Hiring and training burden. Recruiting, advertisements, signup and setup, training, turnover, handoffs and repeated explanation are business pain hypotheses. The retained interviews do not establish a reliable cost per hire or annual saving for 4orm.	D, record		18 Interviews, budgets and business pain
Early materials describe four conversations, not four paying customers.	Early activity. The materials describe four partner conversations, 13 compliance registers and approximately C\$70K deployed. Conversations are not customers; deployed capital is not necessarily external money raised.	2 source links		18 Interviews, budgets and business pain
Founder-history impact and revenue figures remain unverified management statements.	Founder-history claims. Hundreds helped, C\$10M of losses observed, C\$25M of losses said to have been prevented and C\$16K in historical revenue appear in the master. These are unverified management statements, not measured platform outcomes or annual recurring revenue.	M, record		18 Interviews, budgets and business pain
Filogix and Finmo already support mortgage workflows and compliance features.	Filogix and Finmo (Lendesk's Canadian mortgage work process platform), work process existing market position. They already serve broker/lender work processes and offer compliance-related features. Finmo published mortgage-suitability forms in 2023. Integration and additional value beyond existing tools are necessary.	3 source links		19 What existing products prove, and the gap

AVA Credit's reviewed proposition includes oversight and human review of mortgage files.	AVA Credit (a Canadian mortgage technology business), professional tools with oversight and controls. The competitive review describes lists of models in use, records of their use, data-handling rules and human review around mortgage files. Paying-customer progress and financial metrics were not established.	C, record	19 What existing products prove, and the gap
Aveni and Recordsure already connect financial-service interactions to customer outcomes.	Aveni and Recordsure, complete-customer-case evidence. Both address financial-services monitoring and records showing what happened to the customer; Aveni's 2026 expansion strengthens the overlap. A claim that nobody connects the customer case would be inaccurate.	3 source links	19 What existing products prove, and the gap
MorganAsh overlaps with 4orm's proposed customer-understanding approach.	MorganAsh (tools for identifying customers who may need extra help and recording support), understanding and vulnerability. Consumer-supplied assessments, monitoring throughout the customer relationship and board reporting overlap with 4orm's proposed approach to customer understanding. It is a meaningful competitor, not merely a document tool.	2 source links	19 What existing products prove, and the gap
Drata and Vanta show that firms pay for recurring evidence and trust workflows.	Drata and Vanta, recurring evidence budgets. These firms show that companies buy continuous evidence and trust work processes at scale. Their security/compliance categories are examples of similar ways to earn revenue, not direct Canadian mortgage-suitability competitors.	2 source links	19 What existing products prove, and the gap
Harvey's growth does not establish a valuation multiple for 4orm.	Harvey, professional work process adoption. The platform shows rapid expansion in professional work. Its funding and annual recurring revenue do not provide a comparable valuation multiple for an unproven 4orm business.	2 source links	19 What existing products prove, and the gap
Sardine and Alloy show value in connecting data and risk decisions.	Sardine and Alloy, integration plus risk. Coordinating data and decisions between existing systems can create value without manufacturing the financial product. Their identity/fraud coverage differs from full consumer suitability.	2 source links	19 What existing products prove, and the gap
4orm proposes understanding the person before the sale and preserving the decision history.	4orm's proposed difference. Begin with the person before the sale; surface goals, weaknesses, threats, scenarios and unresolved questions; hand useful context to a professional with permission; preserve a shared decision history. This remains a proposed difference that still needs testing.	2 source links	19 What existing products prove, and the gap
Shared evidence patterns support the concept; demand and differentiation still need testing.	What makes the hypothesis credible. The same reusable building blocks, facts, goals, options, explanations, permissions, changes and evidence, appear across the regulatory and customer cases. What remains to prove is unique value, adoption, distribution and willingness to pay.	2 source links	19 What existing products prove, and the gap

Pricing, market estimates and returns

Select a blue source link. Entries with several sources open the full supporting list.

What this says	Evidence and context	Source links	PDF page	Topic
C\$30K per firm annually is an illustrative 4orm price to validate.	Proposed 4orm annual firm value, C\$30K. The earlier pilot package combined work process, professional review and a retrievable record, with consumer access included. This is an illustrative price to validate.	V, record		20 Pricing and willingness to pay
The deck's firm, record and enterprise prices are proposed, not contracted.	Firm and transaction pricing in the current deck. C\$6K-50K+ per firm annually; record options C\$15 / C\$25 / C\$39; supervision C\$25K-100K; software connections between systems C\$100K-500K; enterprise C\$150K-500K. These are suggested price ranges, not contracted prices.	2 source links		20 Pricing and willingness to pay
Implementation and evidence-pack prices are model assumptions.	Service prices in the model. C\$3,500 implementation and C\$450 evidence-pack assumptions; pack testing at C\$250 / C\$500 / C\$1,000. No evidence of completed purchases is established.	M, record		20 Pricing and willingness to pay
Retained workflow-software prices need currency and current-plan confirmation.	Work process price snapshots recorded in the full investor deck. Broki (broker-work process software cited in the pricing research) 99/month; Blu Mortgage (mortgage brokerage software for managing customer relationships) 1,260/year; SkySlope (real-estate transaction-management software) 340/month, with Forms 149/year or 15.99/month. Currency, plan coverage, tax and current availability need confirmation before quotation.	M, record		20 Pricing and willingness to pay
Retained compliance-service prices describe different packages and periods.	Prices for compliance services and extra customer support. AML Shop (an anti-money-laundering compliance services provider) / AMBA (Alberta Mortgage Brokers Association) 5,500-10,250; Guardexia (a compliance-services provider cited in the pricing research) £2,500/month or £27,000/year; MorganAsh MARS, its customer-support assessment tool, £500 or £725/year for 300 consumers, plus VAT. These are different packages and dated price examples, not current quotes.	M, record		20 Pricing and willingness to pay
The model's financial-data connection costs need commercial confirmation.	Connection costs used in the financial plan. Flinks Connect: 500/200 = 2.50 per connection; 1,250/1,100 ≈ 1.14. Enrich: 250/100 = 2.50; 1,100/1,250 = 0.88. Upload: 1,500/100 = 15. Currency and commercial terms need confirmation.	M, record		20 Pricing and willingness to pay
Retained identity and signing prices are not current vendor quotes.	Identity and signing snapshots. Veriff (identity verification software) 0.80 with 49 minimum; Plus 1.39; Sumsb (identity verification and compliance software) 1.85 with 299 minimum; DocuSign C\$40 per user monthly in the master. These are not current vendor quotes or a complete list of direct costs.	M, record		20 Pricing and willingness to pay
Saving 500 hours at C\$60 per hour equals an illustrative C\$30K annual fee.	Practical buyer calculation. At C\$30K annually, saving 500 hours valued at C\$60/hour equals the fee; 1,000 hours equals C\$60K of staff capacity, or 2× the fee before implementation and other costs. This is an example calculation, not a proven cash return from 4orm.	2 source links		20 Pricing and willingness to pay
The C\$2.04B strategic spending ceiling is a management scenario.	C\$2.04B, Strategic ceiling. Broader current-product coverage plus estimated spending in other regulated markets the company might enter. A best-case spending ceiling.	V, record		21 Five market estimates and the revenue plan

The C\$1.77B full-product ceiling assumes use of all applicable features.	C\$1.77B, Full-product spending ceiling. Assumes qualifying firms use all applicable product features. It is not a measured annual market-spend figure.	V, record	21 Five market estimates and the revenue plan
The C\$840.5M recurring market estimate needs a separate mortgage-first calculation.	C\$840.5M, Total recurring-revenue market. The earlier financial plan's estimate for all potential customers of the core product. A mortgage-first plan needs a separate calculation that another person can check.	V, record	21 Five market estimates and the revenue plan
The C\$490.6M serviceable market estimate assumes product fit and buyer budgets.	C\$490.6M, Market 4orm could realistically serve. The earlier plan's estimate for customers that fit the product and are assumed to have suitable budgets. This is the market figure used to calculate the assumed share won.	V, record	21 Five market estimates and the revenue plan
The earlier C\$71.1M revenue target equals about 14.5% of the modelled serviceable market.	C\$71.1M, Earlier revenue target for 2031. About 14.5% of the C\$490.6M market above. The five market estimates overlap and cannot be added together. This earlier target differs from the current deck's C\$94.7M case.	2 source links	21 Five market estimates and the revenue plan
The current deck's C\$94.7M Year 5 target combines several revenue streams.	Current Year 5 target, C\$94.7M, rounded to C\$95M. C\$22M firm platform + C\$12M enterprise + C\$37.5M records + C\$9M supervision + C\$7M software connections between systems + C\$7.2M services. Mixed revenue is not all annual recurring revenue.	D, record	21 Five market estimates and the revenue plan
The revenue target depends on unproven customer counts, prices and usage.	Assumptions behind the target. 1,100 firms × C\$20K; 30 enterprise accounts × C\$400K; 1.5M records × C\$25; 150 supervision accounts × C\$60K; 20 customers buying system connections × C\$350K. Each depends on unproven demand and delivery assumptions.	D, record	21 Five market estimates and the revenue plan
The five-year revenue path is a management scenario, not a third-party forecast.	Example revenue growth and alternative cases. Five annual revenues: C\$0.715M, C\$4.475M, C\$16.25M, C\$43.625M and C\$94.7M. Year 5 alternatives: C\$47M conservative and C\$175M+ supporting technology case. These are management scenarios, not third-party forecasts.	D, record	21 Five market estimates and the revenue plan
Mortgage balances and competitor valuations do not establish 4orm's revenue.	Scale claims are not pricing evidence. Neither the C\$2.4T mortgage balance nor a comparable's billion-dollar valuation establishes the revenue 4orm could win, margins or investor returns.	2 source links	21 Five market estimates and the revenue plan
Equity returns, dividends and exit multiples are scenarios, not promises.	Financial and return forecasts. Equity outcomes, dividends and exit multiples in the older financial materials are scenarios. They are not validation, promised investor returns or evidence of current distributable cash.	M, record	21 Five market estimates and the revenue plan

Pilot measures and evidence to verify

Select a blue source link. Entries with several sources open the full supporting list.

What this says	Evidence and context	Source links	PDF page	Topic
A C\$25 record price leaves 52-84% after assumed direct costs.	Cost and margin for each record. The plan assumes C\$4-12 in direct costs per record. After those costs, a C\$25 price leaves 52-84% of revenue; C\$15 leaves 20-73%; C\$39 leaves 69-90%. Other company expenses still have to be paid. A 70-80% margin is not automatic.	M, record		22 Costs, revenue and what we still need to prove
Margin, expense and acquisition assumptions need proof and reconciliation.	Planning assumptions that still need proof. The plans assume 80-85% gross margin (revenue left after direct delivery costs); C\$35-42M earnings before interest, taxes, depreciation and amortization; and C\$39-44M operating expenses. Other assumptions: 86% margin on repeat revenue and 55% on services; C\$4,200 to acquire a customer; 10% customer loss; 3% price increases from 2029; paid records on 55% of eligible transactions; and 0.6 evidence packs per firm each year. These planning versions need to be reconciled.	2 source links		22 Costs, revenue and what we still need to prove
The proposed pilot targets 5-10 paying firms and 100-250 records.	Pilot scale. The deck proposes 5-10 paid firms and 100-250 records, not achieved traction. Record the starting results before the pilot.	D, record		22 Costs, revenue and what we still need to prove
Consumer tests should measure understanding, effort and unresolved questions.	Consumer measures. Comprehension before/after; unresolved questions resolved; permissions understood; record-view rate; perceived effort; appropriate professional connection; ability to explain key consequences.	2 source links		22 Costs, revenue and what we still need to prove
Business tests should measure time, record quality, setup effort and paid demand.	What to measure for the business. Review time after allowing for any extra tasks; repeated work; missing or conflicting information; record completeness; time to rebuild a transaction history; setup effort; support requests; customers who pay; and willingness to renew.	2 source links		22 Costs, revenue and what we still need to prove
Pilot targets include time savings, record use and annual-contract conversion.	Targets to test. Paid records used on 50% of eligible transactions by month 3; 70% reuse of core product components; 20% time saving after allowing for extra tasks, or a 20% quality improvement; 50% of consumers viewing their record; and 60% of pilot customers choosing an annual contract. Aim for setup within 14 days, then 7, and 70% of record revenue left after direct costs, then 80%.	2 source links		22 Costs, revenue and what we still need to prove
The deck proposes stopping thresholds for weak demand, margins or usability.	When to stop and rethink the offer. The deck flags fewer than 25% of prospects paying; paid records used on fewer than 30% of eligible transactions; less than 65% of record revenue left after direct costs; customer value below 2× the fee; record views below 30%; reusable product components below 50%; or more than 10-15 manual minutes per record. These are proposed tests, not observed results.	2 source links		22 Costs, revenue and what we still need to prove
Renewal rates and dependence on one customer need to be monitored.	Keeping customers and avoiding dependence on one buyer. Review the plan if existing-customer revenue falls below 85% before upgrades, or below 95% after upgrades, reductions and cancellations. Also review it if one customer accounts for more than 20% of revenue. No measured customer-renewal history is established yet.	M, record		22 Costs, revenue and what we still need to prove

Hiring, training, confidence and stress claims need separate measurements.	Recruiting and emotion. Measure hiring avoided, training time, turnover, confidence and stress separately if these are part of the sales claim. The current evidence does not establish 40m-specific values.	D, record	22 Costs, revenue and what we still need to prove
The retained model-governance guideline summary still needs primary-source confirmation.	Office of the Superintendent of Financial Institutions (OSFI; supervises the financial soundness of federally regulated banks and insurers) E-23. The September 18 direction report describes a September 2025 final guideline, effective 1 May 2027, covering enterprise model governance, documentation and accountability. The exact primary release and coverage were not recovered in this refresh; retain as a follow-up source item.	N, record	23 Items retained for verification
The retained international consumer-protection guidance still needs verification.	OECD (Organisation for Economic Co-operation and Development) March 2026 guidance. The report describes updated consumer-protection approaches covering circumstances, needs, explanations and retained information. The exact publication was not independently recovered here.	N, record	23 Items retained for verification
Specific legislative and payment-enforcement dates still need confirmation.	Legislative and payment-supervision dates. The earlier report cites Bill C-15 Royal Assent on 26 March 2026 and 2026 payment-supervision enforcement activity. The general consumer-banking framework is linked; the individual legislative and enforcement events require primary confirmation.	2 source links	23 Items retained for verification
The reported September adviser-platform launch is not verified in this register.	September professional-platform launch. The direction report cites a 14 September 2026 adviser-work process launch and connections to BlackRock (an investment management company), Charles Schwab (a brokerage and financial-services company), Addepar (investment data and portfolio reporting software), Envestnet (wealth-management technology), Orion (wealth-management technology) and Wealthbox (software for managing customer relationships for financial advisers). Original announcement and reporting were not recovered here. Do not use as a verified news headline from this register.	N, record	23 Items retained for verification
The reported UK financial-tool trust finding still needs its original methodology.	UK consumer-model trust finding. The report cites a July 2026 Financial Conduct Authority (FCA; the UK regulator overseeing financial firms' conduct)-related finding that over one-quarter trusted general-purpose tools for financial advice. It is international, and the original group being measured and methodology remain to be confirmed.	N, record	23 Items retained for verification
Additional national mortgage and account-sharing figures still need source checks.	Other national figures that need source checks. The full deck cites 1.33M new mortgage loans worth C\$413.25B in 2025; roughly one-third of consumers using mortgage professionals; approximately 9M people sharing account data through online-banking login access; and roughly 10% bitcoin ownership. Confirm the original national sources and definitions before investor reuse.	M, record	23 Items retained for verification
Research-coverage counts are not customer or regulator endorsements.	Research breadth counts. 60+ platforms, 6+ markets, 40+ events, 10+ regulators, 20+ cases and an older 105-company screen describe internal research coverage. They are not customer or regulatory-validation counts.	M, record	23 Items retained for verification
Original interview transcripts are needed before using exact Ali or ATB quotations.	Exact interview quotations. Ali and ATB spending evidence is preserved as attributed synthesis. Recover original transcripts and permission before using quotation marks or implying institutional endorsement.	V, record	23 Items retained for verification

Definitions and evidence guide

Select a blue source link. Entries with several sources open the full supporting list.

What this says	Evidence and context	Source links	PDF page	Topic
This register brings together the evidence behind 4orm.	Purpose. A single reference for the validation in the current deck, investor master, market-evidence report and competitive research, with selected public-company updates. Canadian national evidence comes first; global cases are labelled.	Context / proposal		1 Evidence supporting 4orm
Regulators expect customer understanding and records supporting decisions.	What is strongest. Regulators expect customer understanding, appropriate products and demonstrable records. Named businesses report less administration, faster signup and setup, more completed applications and sales and stronger oversight. These support the need and operating mechanisms; they do not establish 4orm results.	Context / proposal		1 Evidence supporting 4orm
Suitability means a product fits the person's needs, goals and financial circumstances.	What suitability means. Whether a product fits the person's needs, financial circumstances, goals and ability to handle the risks.	Context / proposal		1 Evidence supporting 4orm
Published findings describe a defined population.	Published finding A regulator, government body, industry association or survey reports a result for a defined group being measured.	Context / proposal		1 Evidence supporting 4orm
Customer cases report results from specific implementations.	Customer case A vendor or its customer reports a customer implementation result. It is not an independent experiment, national average or guaranteed saving.	Context / proposal		1 Evidence supporting 4orm
Interviews and financial scenarios are separate from external validation.	Discovery / model Internal interviews, company history, pricing, market layers and financial scenarios remain separate from external validation.	Context / proposal		1 Evidence supporting 4orm
Source codes identify the original publication or supplied material.	Source status Linked source codes open the original source. D, M, V, N and C identify supplied materials. A deck-only claim is preserved as such when its original study was not independently refreshed.	Context / proposal		1 Evidence supporting 4orm
Funding, valuation, revenue and customer assets measure different things.	Table definitions Annual recurring revenue is repeat revenue expressed as a yearly amount. Customer assets are money held or managed for clients, not company sales. Funding, valuation, loan volume and customer assets are different measures. Not verified means not established in the reviewed sources, not zero.	Context / proposal		1 Evidence supporting 4orm
Market statistics cover Canada; customer cases may describe local deployments.	Scope: provincial-only market statistics are excluded. Company customer cases may be local deployments. The review covers named vendors in the available materials; it does not imply an exhaustive census of the industry. Publication dates and observation periods may differ.	Context / proposal		1 Evidence supporting 4orm
Amounts retain their original currencies and units.	Amounts: C\$ = Canadian dollars; US\$ = US dollars; £ = British pounds. K = thousand; M = million; B = billion; T = trillion. A valuation is an estimated company value, not cash received or revenue.	Context / proposal		1 Evidence supporting 4orm
Filter by category and use source codes to find the supporting material.	Filter the Category column to browse the evidence. Source codes match the Sources tab. PDF page identifies the original document page.	Context / proposal		1 Evidence supporting 4orm

Octopus Money reported 50% less review time while expanding coverage.	Octopus Money / Aveni	K18, open	Time & costs
Zello reported 700+ hours saved annually, valued at \$70,000+.	Zello / Drata	K20, open	Time & costs
MyOutDesk reported capacity equivalent to about three roles.	MyOutDesk / Drata	K22, open	Time & costs
Jellyfish reported saving two to three hours each week.	Jellyfish / Drata	K23, open	Time & costs
Snowflake reported saving 2,000+ hours annually through self-service trust information.	Snowflake / Vanta	K24, open	Time & costs
Perforce reduced compliance work from 60% to 15% of team time.	Perforce / Vanta	K26, open	Time & costs
Duolingo reported a programme manager saving up to 12 hours weekly.	Duolingo / Vanta	K27, open	Time & costs
Consumers Credit Union reported five dollars of avoided fraud loss per software dollar.	Alloy, Consumers Credit Union case study	K32, open	Time & costs
Recordsure's cost and selling-time headlines lack a named case in the retained evidence.	4orm Competitive Landscape and Market Whitespace, 18 September 2026. Supplied competitive review; qualitative capability assessment. Supplied material; no public URL.	C, record	Time & costs
Recordsure's cost and selling-time headlines lack a named case in the retained evidence.	4orm Investor Master Data Preserved, 171 slides, September 2026. Supplied master; national data and cases retained with their named original publishers. Supplied material; no public URL.	M, record	Time & costs
Released staff capacity and cash savings are different benefits.	4orm Pitch Deck Redesigned With Comparables, 49 slides, 21 September 2026. Supplied deck; underlying figures not all independently refreshed. Supplied material; no public URL.	D, record	Time & costs
FirstBank reported 20% higher loan-officer productivity.	4orm Investor Master Data Preserved, 171 slides, September 2026. Supplied master; national data and cases retained with their named original publishers. Supplied material; no public URL.	M, record	Sales & retention
Prosperity reported US\$141M in additional funded loans, not company revenue.	4orm Investor Master Data Preserved, 171 slides, September 2026. Supplied master; national data and cases retained with their named original publishers. Supplied material; no public URL.	M, record	Sales & retention
U.S. Bank reported 40% of pre-applicants completed an application.	4orm Investor Master Data Preserved, 171 slides, September 2026. Supplied master; national data and cases retained with their named original publishers. Supplied material; no public URL.	M, record	Sales & retention
Compass Mortgage increased online applications from about 10% to over 50%.	4orm Investor Master Data Preserved, 171 slides, September 2026. Supplied master; national data and cases retained with their named original publishers. Supplied material; no public URL.	M, record	Sales & retention
Clark Knapp reported a 15% higher share of sales opportunities closing.	4orm Investor Master Data Preserved, 171 slides, September 2026. Supplied master; national data and cases retained with their named original publishers. Supplied material; no public URL.	M, record	Sales & retention
BT Business reported customer loss falling by six percentage points.	BT Business / Pega	K15, open	Sales & retention
GitLab reported sales cycles 10-14 days shorter and fewer security questionnaires.	GitLab / SafeBase-Drata	K21, open	Sales & retention
Clay reported 20% shorter deal cycles after a joint compliance implementation.	Clay / Vanta and Workstreet	K28, open	Sales & retention
Zello reported sales cycles three to 14 days shorter.	Zello / Drata	K20, open	Sales & retention
Bancolombia cut data collection from 79 days to 34.	Bancolombia / Workiva	K13, open	Audit & risk
Mineros cut its financial-statement cycle from one month to one week.	Mineros / Workiva	K14, open	Audit & risk
Connective cut security-audit preparation from 4-5 months to five weeks.	Connective / Drata	K19, open	Audit & risk

GitHub reported automating 93% of security-questionnaire work.	GitHub / Vanta	K25, open	Audit & risk
Samsara reported 50% faster vendor reviews.	Vanta, US\$300M ARR milestone, 29 April 2026	G1, open	Audit & risk
Octopus Money expanded review from a 10-15% sample toward all interactions.	Octopus Money / Aveni	K18, open	Audit & risk
BNP Paribas built a reusable record of customer checks across the bank.	BNP Paribas / Fenargo	K12, open	Audit & risk
Retrievable records can support audits, complaints and management reporting.	4orm Pitch Deck Redesigned With Comparables, 49 slides, 21 September 2026. Supplied deck; underlying figures not all independently refreshed. Supplied material; no public URL.	D, record	Audit & risk
Retrievable records can support audits, complaints and management reporting.	4orm Competitive Landscape and Market Whitespace, 18 September 2026. Supplied competitive review; qualitative capability assessment. Supplied material; no public URL.	C, record	Audit & risk
Raise reported 98% less manual review with Sardine.	Sardine, Raise, Prezzy and Novo customer summaries	K29, open	Audit & risk
Prezzy reported approval rates up to 70% higher with Sardine.	Sardine, Raise, Prezzy and Novo customer summaries	K29, open	Audit & risk
Novo reported 90% fewer card-dispute payment reversals with Sardine.	Sardine, Raise, Prezzy and Novo customer summaries	K29, open	Audit & risk
IncredibleBank reported automating 90% of account openings.	Alloy, IncredibleBank case study	K30, open	Audit & risk
Suncoast reported 35% lower fraud losses and higher digital membership completion.	Alloy, Suncoast Credit Union case study	K31, open	Audit & risk
Suncoast's case records 269M logins and 103,000 digital products opened.	Alloy, Suncoast Credit Union case study	K31, open	Audit & risk
Consumers Credit Union reported automating 78% of onboarding.	Alloy, Consumers Credit Union case study	K32, open	Audit & risk
Earnest increased approvals from 45% to over 70%.	Alloy, Earnest case study	K33, open	Audit & risk
4orm's integration proposal combines approved data reuse with professional review.	4orm Pitch Deck Redesigned With Comparables, 49 slides, 21 September 2026. Supplied deck; underlying figures not all independently refreshed. Supplied material; no public URL.	D, record	Audit & risk
4orm's integration proposal combines approved data reuse with professional review.	4orm Competitive Landscape and Market Whitespace, 18 September 2026. Supplied competitive review; qualitative capability assessment. Supplied material; no public URL.	C, record	Audit & risk
Ask what remains in the household budget if mortgage payments rise.	4orm Validation and Market Evidence, 19 September 2026, 14 pages. Supplied report with linked regulator and customer sources. Supplied material; no public URL.	V, record	Consumer benefits
Ask how long savings would cover payments after an income interruption.	4orm Validation and Market Evidence, 19 September 2026, 14 pages. Supplied report with linked regulator and customer sources. Supplied material; no public URL.	V, record	Consumer benefits
Ask about future life changes, other debts and the cost of leaving the product.	4orm Pitch Deck Redesigned With Comparables, 49 slides, 21 September 2026. Supplied deck; underlying figures not all independently refreshed. Supplied material; no public URL.	D, record	Consumer benefits
A professional can address gaps through price, structure, reserves or timing.	4orm Validation and Market Evidence, 19 September 2026, 14 pages. Supplied report with linked regulator and customer sources. Supplied material; no public URL.	V, record	Consumer benefits
Connected information can reduce repeated paperwork and document collection.	EQ Bank / Flinks	K3, open	Consumer benefits
Connected information can reduce repeated paperwork and document collection.	Santander UK / Docusign	K7, open	Consumer benefits
Faster onboarding can reduce waiting, but does not prove better suitability.	Wealthsimple / Flinks	K2, open	Consumer benefits
Faster onboarding can reduce waiting, but does not prove better suitability.	Trustmark / Docusign	K9, open	Consumer benefits

Faster onboarding can reduce waiting, but does not prove better suitability.	First Citizens / Docusign	K11, open	Consumer benefits
Desjardins' customer recommendation score improved by 11 points.	Desjardins / Bain	K4, open	Consumer benefits
KBH's overtime testimony supports reduced strain without quantifying mental-health outcomes.	KBH / Docusign	K1, open	Consumer benefits
Mineros described greater reporting confidence and an easier audit process.	Mineros / Workiva	K14, open	Consumer benefits
Separate auto-finance measures report about 30 or 38 minutes saved.	4orm Investor Master Data Preserved, 171 slides, September 2026. Supplied master; national data and cases retained with their named original publishers. Supplied material; no public URL.	M, record	Consumer benefits
4orm should test whether consumers understand costs, risks and alternatives.	FCAC, National Financial Literacy Strategy 2021-26	R7, open	Consumer benefits
