

# Somebody is holding your money **right now**

A deposit on a house. A retainer with a lawyer. Wages sitting with a payment company between the day they were earned and the day they can be spent. Since 8 September 2025 a Canadian business holding money for its customers has had to write down every day how much it holds and whose it is. **Almost none can prove it was done.**

## 1 What changed, and what it costs to get it wrong

### 1 The payments duty, in force since 8 September 2025

- **The duty falls every morning.** A registered payment service provider has to know whose money it is holding, compare that against the account, and keep the answer where a reviewer can read it.
- **745 of the 1,562 registrants hold customer money.** That is the population the duty attaches to, against \$1.19 trillion moving through payments.

### 2 The money laundering regime, changed on 26 March 2026

- **Penalties rose forty fold.** A violation reaches \$20,000,000 for an entity and \$4,000,000 for a person, capped at three per cent of global revenue.
- **A programme that does not work is now a violation in itself,** and enforcement moved with it: 29 notices in 2025 totalling \$203.1 million, against \$19.0 million the year before.

### Both regimes land on the same firms, and the evidence one asks for is the evidence the other asks for.

At almost every firm that owes the work it is done by hand in a spreadsheet. QuadrigaCX at \$169 million, Bridging Finance at \$1.3 billion expected, iPro Realty at \$10 million and the Save Max brokerages at \$2.7 million were each found by a collapse, a receiver or a regulator, never by the monthly check.

## 2 What the record is worth once somebody builds it

Bars start at zero and run to \$105,276,946. Recurring revenue at 31 December 2031 is **\$108,935,933** on 835 customers and 31 partners, at a 77.6 per cent gross margin, on 47 people. Source: master pro forma of 17 August 2026, base case.

# What the evidence carries

Twenty three products read on their own published material, five prices measured against real contracts, and a workbook that checks itself in sixty five places. The plan holds 28.7 per cent of the 745 fund holding firms at 2031, against 24.0 per cent for Avalara and 31.0 per cent for Verafin, each measured against a population of its own.

## 3 Nobody occupies the intersection, and the gap is the investment case

Bars start at zero and run to twenty three, the full set assessed. Reaching both the bank account and the customer ledger is a different product, not a feature.

## 4 What the price is measured against

| Tier                    | What a customer locks | Nearest published comparable         |
|-------------------------|-----------------------|--------------------------------------|
| Command and institution | \$858,750             | MetricStream mid market licence band |
| Enterprise and complex  | \$274,375             | AuditBoard enterprise band           |
| Mid market regulated    | \$104,063             | AuditBoard mid programme band        |
| Small regulated firm    | \$36,813              | Drata observed median contract       |
| Partner and white label | \$162,500             | None found in any market             |

**Legend.** A firm signing from 1 January 2028 keeps that price for as long as it stays. The small tier carries 631 of the 835 customers and \$20,666,383 of the revenue. The partner tier has no comparable anywhere.

## 5 What the model does to itself, and what would make it wrong

6 Found by taking the plan apart

- Overdrawn in eight months before the seed, low point May 2028 at \$778,960.
- Nine switches turn whole revenue lines off, so a reader can test the plan rather than argue about it.
- Two of the sixty five checks read REVIEW by design, and the earnings margin must not be quoted yet.
- An earlier claim of 224 firms inside three years was withdrawn during the rebuild rather than defended.

7 What would make this wrong

- AutoRek localises for Canada first. It has the engine and already names Canada on its coverage line.
- The second duty share is lower than modelled, so that line stays switched off until a customer signs.
- Firms wait for a reviewer, or an adviser productises a fixed price pack before we do.

# What we are asking for

A pre-seed released against evidence rather than dates, and a seed priced on paying customers rather than on a forecast.

## \$2,050,000

PRE-SEED, IN FIVE  
INSTALMENTS

## \$550,000

ALREADY COMMITTED  
AT AUGUST 2026

## \$3,500,000

SEED IN 2028, AT  
\$30.0M POST-MONEY

## 24.22%

INVESTORS HOLD  
AFTER THE SEED

## 6 The raise, and where the money goes

### 1 What is being offered

- A \$50,000 angel cheque, already advanced, as shares bought at a set price.
- \$2,050,000 of pre-seed in five instalments. The first is committed at close and the rest release against named milestones. Instalments three, four and five convert at ceilings of \$15M, \$18M and \$20M.
- \$3,500,000 of seed in 2028 at \$30.0 million after the money, 1.5 times recurring revenue of \$19,486,034. Fits a registered retirement savings plan or a tax free savings account, under Alberta law.

### 2 Where it is spent

- **Product and engineering.** The evidence store and the two dates finish before the first screen is drawn, because neither can be added afterwards.
- **Security and assurance.** Independent architecture and penetration review before any enterprise sale, never run by the team that wrote it.
- **Go to market and delivery.** The Bank of Canada prints the buyer list, so there is no broker to pay.

## 7 What comes back, and when

| Line                    | In                 | Cash back in full     | Cash by 2038        | Multiple     |
|-------------------------|--------------------|-----------------------|---------------------|--------------|
| Angel                   | \$50,000           | 2029, month 4         | \$2,333,119         | 46.7x        |
| Pre-seed, tranche one   | \$500,000          | 2029, month 8         | \$11,665,597        | 23.3x        |
| Pre-seed, tranche two   | \$500,000          | 2029, month 8         | \$11,823,617        | 23.6x        |
| Pre-seed, tranche three | \$500,000          | 2029, month 9         | \$9,853,014         | 19.7x        |
| Pre-seed, tranche four  | \$500,000          | 2029, month 10        | \$8,867,713         | 17.7x        |
| Seed, 2028              | \$3,500,000        | 2030, month 2         | \$41,382,660        | 11.8x        |
| <b>All investors</b>    | <b>\$5,550,000</b> | <b>2029, month 11</b> | <b>\$85,925,720</b> | <b>15.5x</b> |

**Legend.** Cash actually paid out, shares valued at nothing and no sale assumed. Investors take the whole distribution until they have had four times their money back.

**Three signed enterprise contracts and one completed review retire the objections.**
