

The background features a large, flowing, rainbow-colored wave that curves from the top left towards the bottom right. The colors transition smoothly from purple and blue on the left to green and yellow on the right. A black crosshair symbol, consisting of a horizontal line and a vertical line intersecting, is positioned to the left of the word 'Speer'.

**Meet the creators of
the new digital world**

About Us

Established in 2019, Speer aims to design and build products to make your business more effective and efficient.

40+

Web and mobile platforms successfully launched for our partners.

2.5M

Daily active users supported across multiple platforms.

25

Patents received for innovative solutions we developed.

\$8.75M

In subsidies and grants raised on behalf of our partners.

Our Partners

At Speer, we collaborate with partners across diverse industries—from finance and aviation to health and smart infrastructure. The key partners shown here reflect our ability to deliver scalable, secure, and innovative digital solutions tailored to complex enterprise needs. Whether building internal tools, customer platforms, or integrating emerging tech, we bring a flexible, user-focused approach to every project.

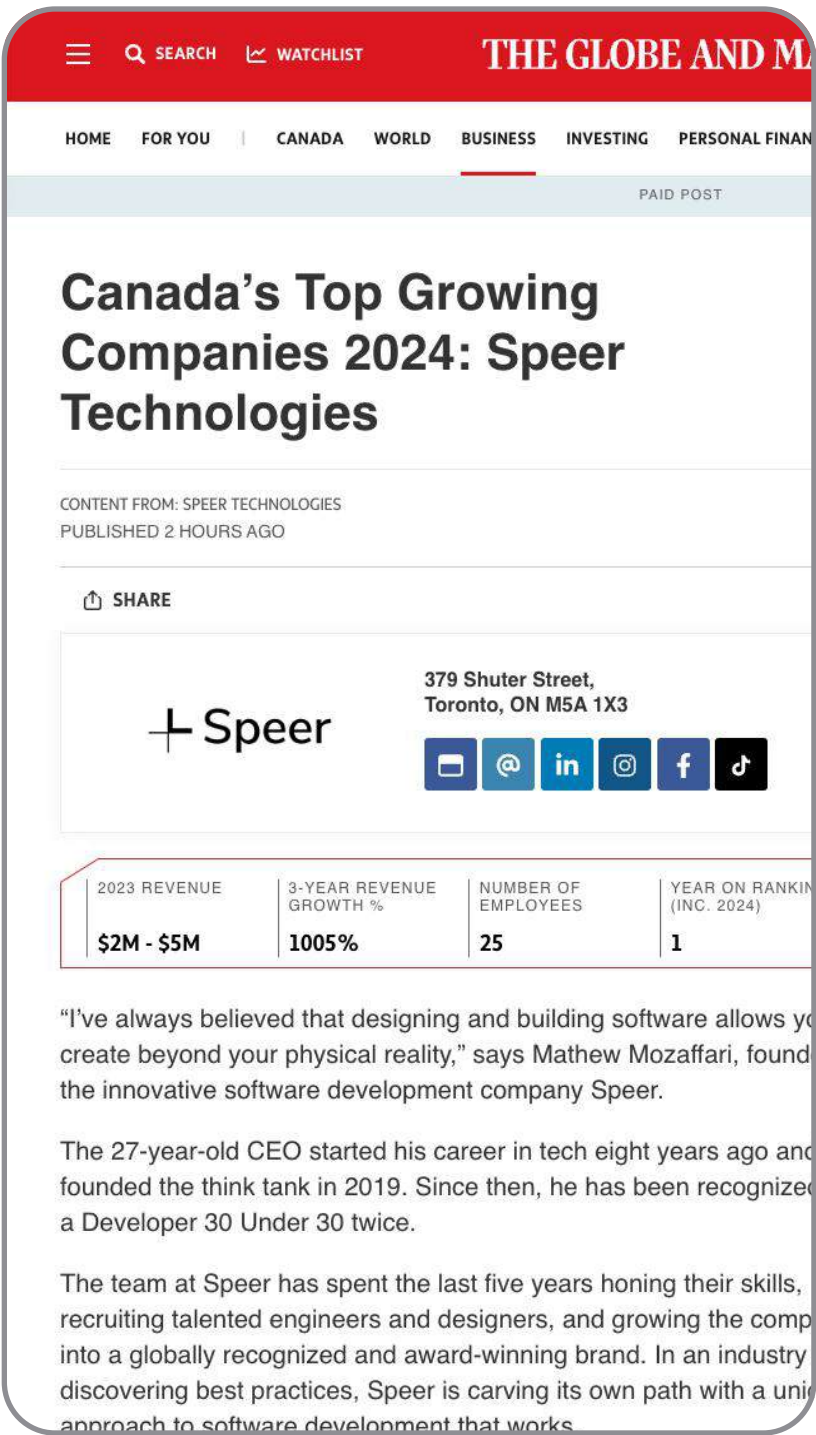

Academic Partnerships

Our partnerships with universities and training organizations enable us to access top emerging talent, co-develop curriculum, and provide students with real-world experience through the Speer Labs program. These relationships ensure our training pipeline remains current, inclusive, and aligned with global needs.

WE COLLABORATE WITH THE FOLLOWING LEADING GLOBAL ACADEMIC INSTITUTIONS TO CREATE PATHWAYS BETWEEN EDUCATION AND INDUSTRY.

+ Speer

Grata

Grata is a technology company that provides modern property management solutions for large residential communities. Speer helped restructure their team from offshore to local and built a digital platform serving over 60,000 residents, including iOS, Android, and web apps, along with procuring and integrating smart locks and hardware.

WORKING WITH SPEER

Deloitte.

Greenshield

Speer collaborated with Deloitte to help design and implement GreenShield’s new insurance app platform. Together, they created an integrated digital solution that streamlined member services. The partnership resulted in a modern, user-friendly platform that improved both operational efficiency and customer engagement.

WORKING WITH SPEER

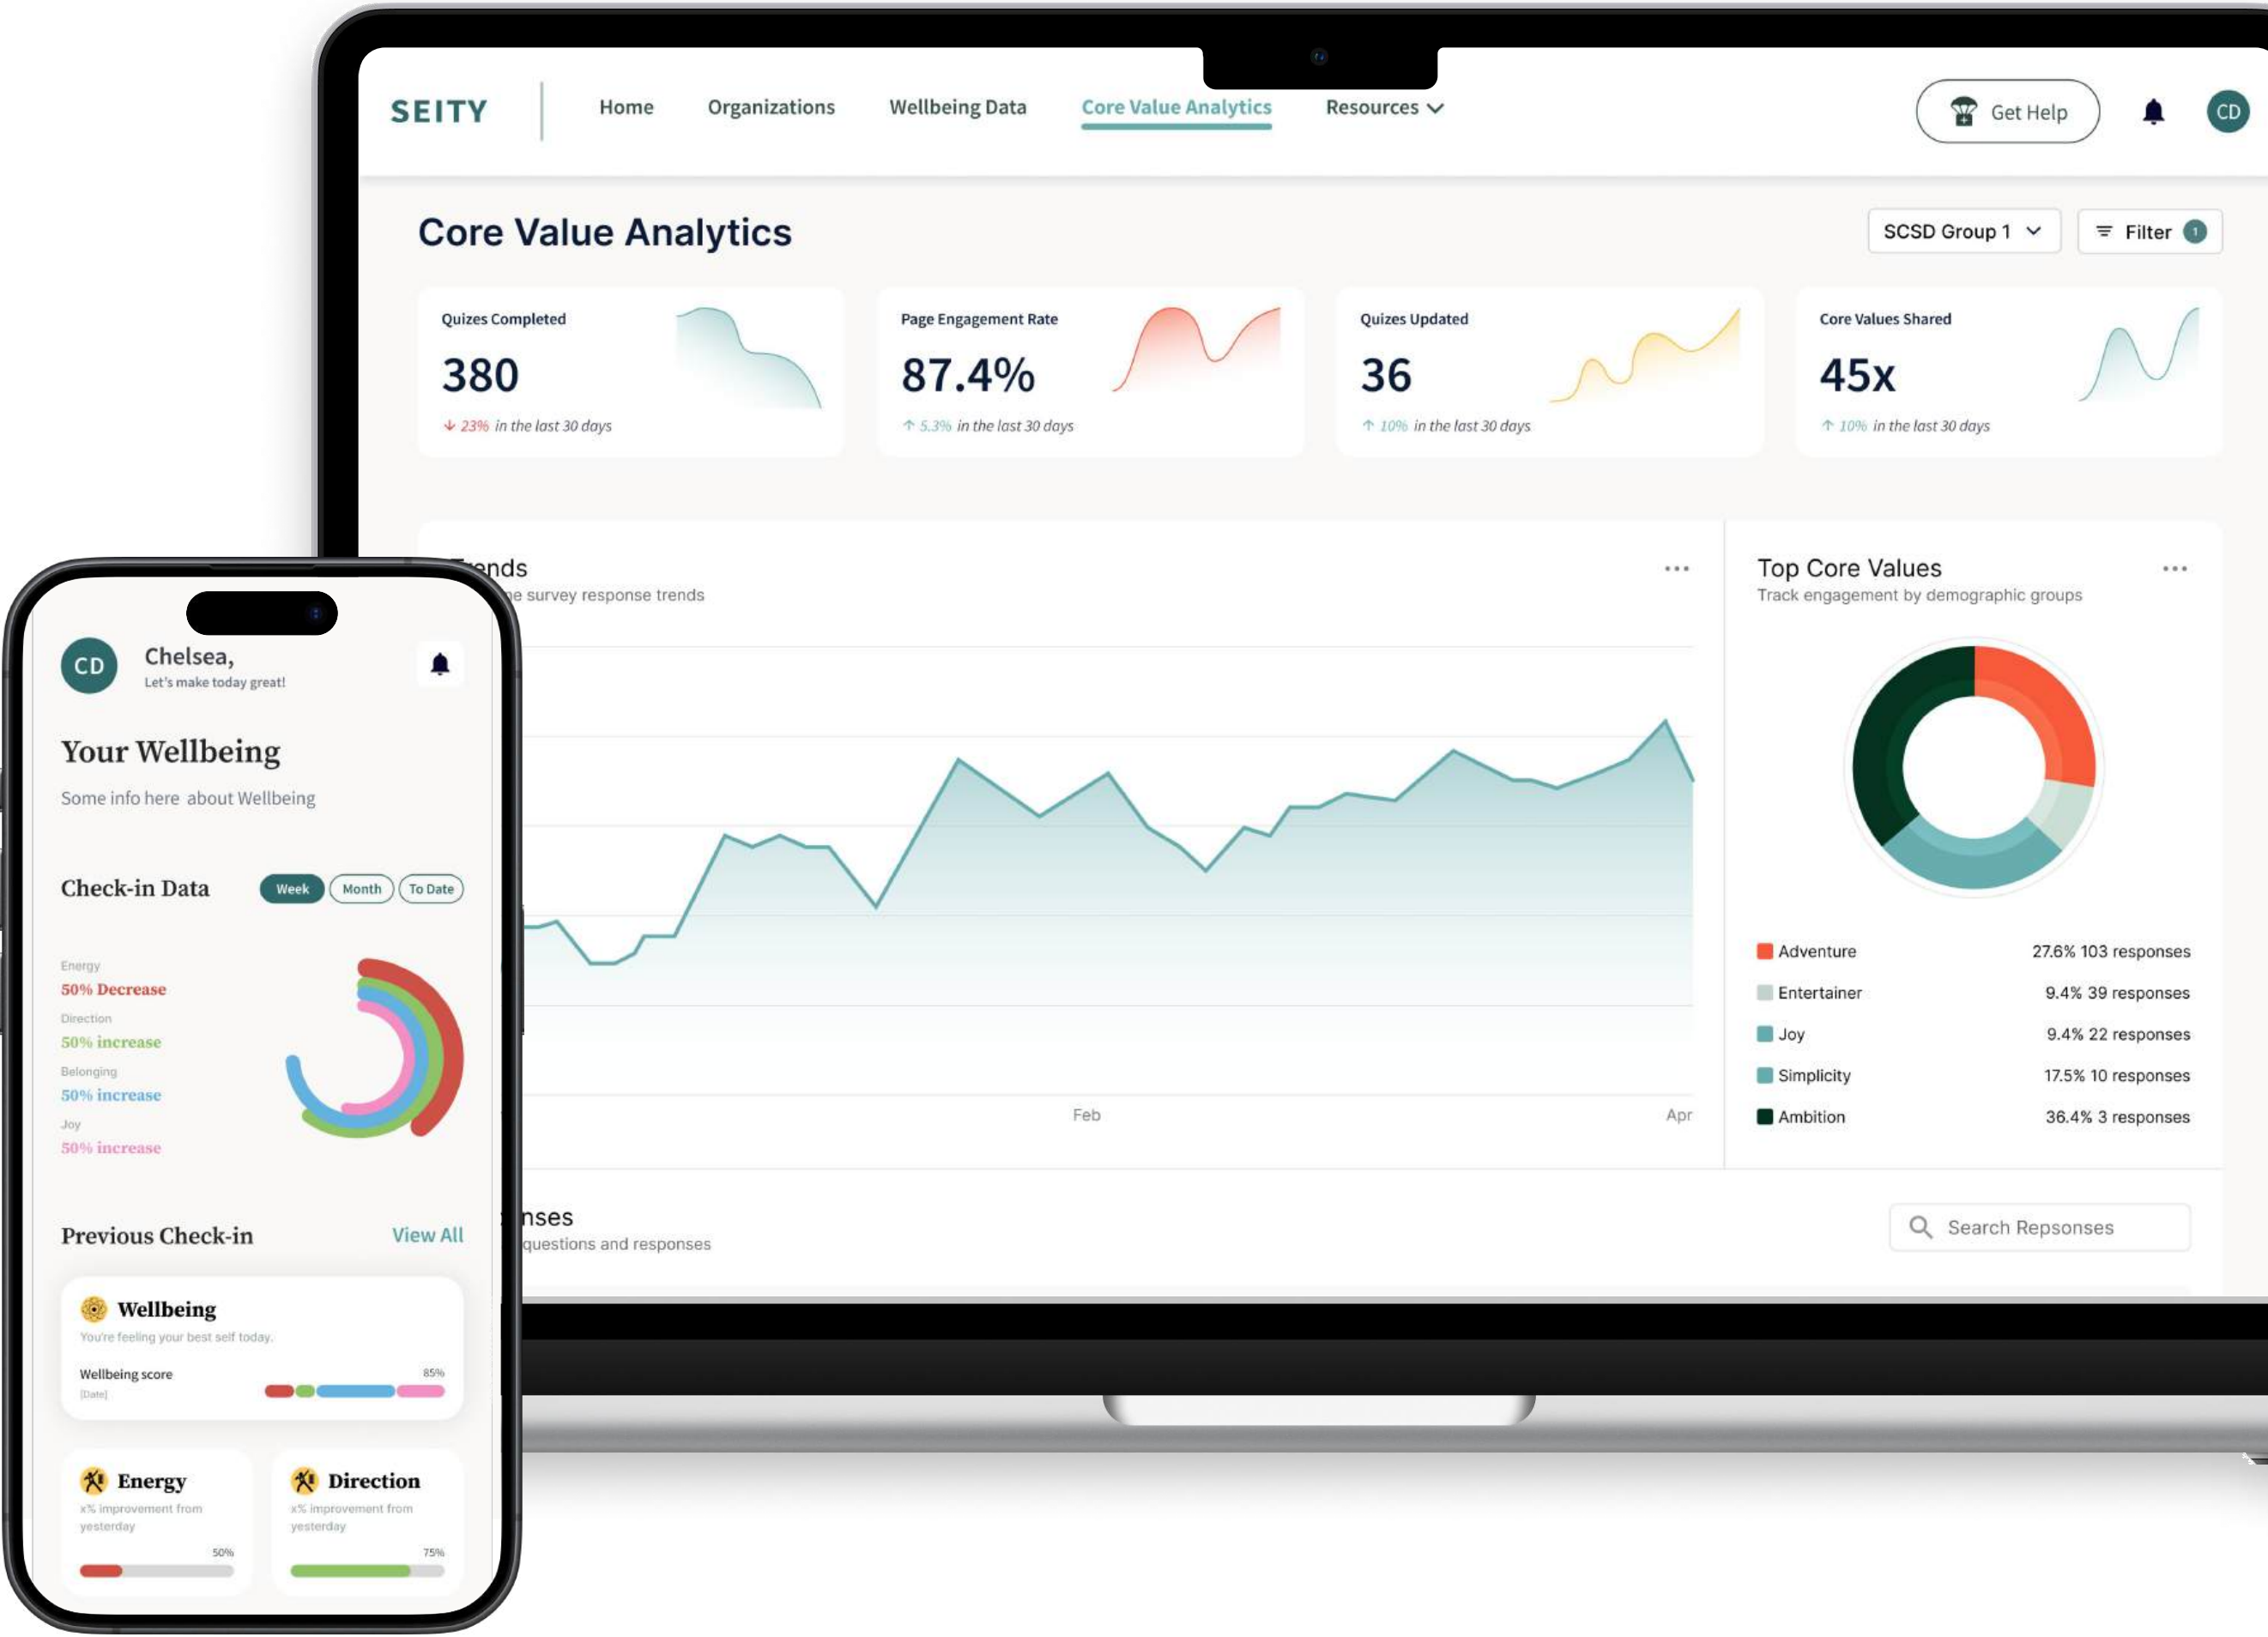

Seity Health

Seity Health is a platform that uses AI and behavioral science to help people, schools and organizations align with their core values. Working with companies like Pfizer, Seity provides digital tools that improve performance and workplace culture. Speer Technologies supported Seity with engineering and design to create a polished, user-friendly experience, and to ultimately build Pfizer’s mental-health assessment app.

Healthcare (Psychology, Social Work & Counseling)

DIMO

DIMO is a connected vehicle platform that uses blockchain and IoT technology to give drivers control over their car data. Investors loved Dimo’s product but were concerned that users in the automotive industry found the app difficult to navigate. Speer stepped in to create a refined, intuitive design and rebuilt the app to optimize Bluetooth communication with DIMO’s devices, delivering a far more seamless user experience.

DEA Aviation

DEA Aviation Ltd. is a UK-based, technology-driven provider of advanced airborne intelligence, surveillance and reconnaissance (ISR) services. Their fleet of sensor-equipped aircraft enable mission-critical operations for government and commercial clients worldwide. Speer built a web control panel for the airport hangar team that shows the live position, route, and mission status of DEA Aviation’s aircraft.

Ikea

Speer helped IKEA enhance its augmented-reality experience by building the LiDAR-powered features behind the IKEA Place app (now part of the IKEA app’s Kreativ experience). Speer implemented advanced depth sensing and spatial mapping on iOS and Android, allowing the app to accurately detect room dimensions and lighting to place true-to-scale 3D furniture in real spaces.
