

Where the company stands, at 17 August 2026

4orm Finance is pre-revenue. It has an entity, counsel, a build partner under contract, an angel cheque advanced, the first pre-seed instalment committed, and a plan whose numbers have been taken apart and rebuilt. There is no paying customer and no running system.

\$550,000

COMMITTED CAPITAL
AT AUGUST 2026

\$500,000

DEPLOYMENT PLANNED
TO 31 JANUARY 2027

\$775,000

NON-DILUTIVE MAPPED,
NONE AWARDED YET

1 Capital, and what it has bought

The angel cheque

\$50,000 advanced by Don Hickling as shares bought at a set price, not a loan. Ten per cent of each pre-seed tranche repays it, to a total of \$30,000.

The pre-seed

\$2,050,000 in five instalments. The first is priced and committed at close, conditioned on the intellectual property assignment from the build partner. The rest release against named milestones, not dates.

The deployment plan

\$500,000 across six tranches from 15 August to 31 December 2026, with \$321,620 committed out and \$103,380 of headroom after a 15 per cent contingency.

Non-dilutive money

Eight programmes mapped, worth \$775,000 across the plan, \$305,000 of it in 2026 and 2027. None is awarded, all of it sits inside the base case, and switching it off takes the low month to \$1,123,710.

2 The entity, the counsel and the build partner

1 Corporate

- Incorporated in Alberta, office in Calgary, with counsel at Osler, Hoskin and Harcourt and at Fasken Martineau.
- Offering documents drafted. Engagement letters are in the data room at 4ormdr.com.

2 Build

- Speer Technologies engaged as build partner, working to our design and our tests.
- The intellectual property assignment is the condition on the first pre-seed instalment.

3 People

- Chad R. Johnston, Founder and Chief Executive. Kevin Wong, co-founder, go to market. Zed Sandeela, systems architect.
- Chief Technology Officer in negotiation, regulatory lead search in progress, and an advisory bench of six.

What has been produced, and what it settles

Six documents and one workbook now carry every figure the company quotes, and each displaced an earlier number that could not be sourced.

What was built	What it settles
The master pro forma, rebuilt	29 tabs, 65 internal checks, 9 switches. 2031 revenue \$105,276,946
Price evidence across all five tiers	Each tier against a published price or an observed contract. Four of five
Service and price comparison	The ten lines the company sells, set against who else sells each one
Comparables and benchmarks	23 products read on their own material. None carries the Canadian rule
The technology set	Four subjects, each a full paper and a summary, behind a disclosure fence
The vision paper	The case for the company, every figure carrying the body that published it

Legend. Read 16 and 17 August 2026. Source: master pro forma of 17 August 2026.

3 What was corrected rather than defended

A capture claim was withdrawn	An earlier plan targeted 224 firms inside three years, six signatures a month from a standing start. The plan now reaches 214 firms by 2031, 28.7 per cent of the 745.
Two regulatory claims were removed	The regulation names no first date for an independent review and imposes no period the review must cover. Neither is asserted now.
The middle of the price ladder rose	Mid market was priced at the bottom of its observed band. Moving it inside added \$2,928,718 to 2031 on the same customer count.

4 The gates that are still open

Gate	What it unlocks	Status
A live evidence record carrying real customer data	Any external product claim	Open
Customer isolated vault and integrity manifest	Verifiable evidence language	Open
Grounded retrieval with citations and approval gate	Module pricing	Open
Five paid customers or signed commitments	The small firm price	Open
Signed partner terms with named first clients	Partner revenue	Open

Legend. Until a gate is passed, the claim it supports carries the gap beside it.

Nothing above is a customer.

40rm Finance is pre-revenue with no running system in production. Three signed enterprise contracts and one completed independent review retire the pricing and product objections. Nothing else retires either.
