

FOR THE REGULATED BUSINESS

Prove the work was done, from the systems you already run

Your people carry the duty and your firm carries the liability. What is missing is not effort, it is the record showing why the recommendation suited that customer.

100%	\$1.2M	\$10M	\$29,450
OF FILES IN A TARGETED FSRA REVIEW HAD NO DOCUMENTED SUITABILITY	FSRA PENALTIES ACROSS 100 ENFORCEMENT ACTIONS, FY2024-25	MAXIMUM RPAA PENALTY FOR A VERY SERIOUS VIOLATION	BASE CARD A YEAR, THE SMALLEST REGULATED FIRM

The five questions	The answer
Who it is for	The firm carrying the duty: a brokerage, a dealer group, an agency, or a payment provider holding end user funds
What it is	Infrastructure that assembles the transaction record from systems you already operate, and produces the evidence pack on request
When and where	From the day it is switched on. Canada first, in mortgage brokering, automotive finance and regulated payments
What it never does	It never holds or moves client money, never decides, and never performs your independent review

Where it hurts today	The gap behind it	What 4orm changes
An examination pulls two people off their job for a week	The file is reconstructed from an inbox, a drive and somebody's memory	The reviewer's file is produced on request, from records written as the work happened
A complaint becomes a reconstruction exercise	Nothing recorded why this product suited this customer at the time	The reason is captured while it is fresh, dated against what was known then
Supervision is an annual scramble	Deficiencies surface at the review rather than as they occur	Incomplete files surface the day they occur, across everyone acting in your name
The reasoning leaves when the person does	It was never written down anywhere the firm owns	The record outlasts whoever made it and transfers with the file

Legend. Substitution rather than a new budget line: file review, compliance consulting and reconstruction hours are spent on this today. Prices are the base card, pre-2027.

What it saves, in the units a principal broker actually counts.

Days of reconstruction per examination, and the cost of a complaint nobody can answer from the file.
