

4orm helps protect the relationship between consumers and the businesses guiding their financial decisions.

Trust starts before the transaction. Consumers need to understand what they are considering, what questions to ask and what they are agreeing to. Businesses need to understand the consumer's needs, circumstances and intentions.

4orm helps both sides stay aligned throughout the process and preserves the important information behind the transaction. If questions arise later, there is a clear record of what was known, what was discussed, what was agreed to and why the decision was made.

CHARGED TO A CONSUMER
IN ANY SCENARIO

4orm Finance builds the record of what happened in a consequential consumer financial transaction: what the person wanted, what was known, what options existed, what was recommended and why, what was disclosed and acknowledged, and what followed. The consumer gains understanding. The regulated business gains evidence.

The company sells to the regulated business. The consumer is never charged.

4ormIQ is the free consumer product. Transaction Integrity is the commercial platform behind it, and mortgage brokering is the first paid market.

The Industry Challenge

MARKET CONTEXT

The test is no longer whether a form was completed. It is whether the file shows why the decision suited that consumer, and supervisors have measured how often it cannot.

1 The record is missing

No documented suitability in **100%** of mortgage files reviewed, against 85% a year earlier.

2 Disclosure fails with it

73% of files short on material risk disclosure, and **65%** on conflicts.

3 Supervision fails too

100% of entities examined supervised brokering activities inadequately.

4 Complaints are rising

RECO opened **2,878** complaints in 2025, up **88%** on 2024.

5 The direction is wider

105 firms reviewed, with suitability determinations recorded without a basis.

6 The precedent is priced

UK motor finance redress confirmed at **£9.1bn** across 12.1m agreements.

Ontario mortgage brokering, FSRA targeted supervision 2024-25. Targeted findings on selected files.

This is not simply a story about bad advice.

The regulator often cannot see enough evidence to determine whether the advice was appropriate in the first place. That is a record failure, and it is the one we solve.

SOURCES • [FSRA SUPERVISION PLAN 2025-26](#)

A Better Suitability Outcome

WHAT THE PRODUCT IS FOR

4orm makes suitability easier to **establish**, not merely easier to document.

Consumer outcome	A clearer understanding of why this recommendation fits them
Professional outcome	A better conversation, and structured support for judgement
Firm outcome	A transaction another qualified person can reconstruct and review

The Same Demand Is Appearing Across Financial Markets

DECISION INTEGRITY, MARKET BY MARKET

Market	What has to be established	What the regulator has already found
Mortgage	Why this mortgage suited this borrower	FSRA: no documented suitability assessment in 100% of files
Investments	Why this investment suited the client's objectives and risk	CSA and CIRO, 105 firms: suitability recorded without the basis
Insurance	Why this product met the person's needs, and why it was recommended	FSRA: missing notes, product range disclosure, needs analysis
Auto finance	What options existed, what was presented, why this one was selected	OMVIC guidance on lender submissions, offers and compensation
Real estate	What was disclosed, authorized and understood	RECO: 2,878 complaints in 2025, up 88% on 2024
Client money	Not suitability. Whether controls occurred and money stayed put	Financial position integrity, a controls question

SOURCES • [FSRA](#) • [CSA AND CIRO](#) • [OMVIC](#) • [RECO](#)

Who Does This Impact

WHERE THE DUTY LANDS

Market	Firms	Professionals	Transactions a year	What the regulator has found
Mortgage brokering, Ontario	1,162	14,585	270,000	100% of reviewed files without documented suitability
Real estate, Ontario	3,738	111,332	470,314 national	Complaints up 88 per cent in one year
Automotive, Ontario	8,000	30,000	1,897,055 national	Guidance on undisclosed lender compensation
Life and health, Ontario	6,680	61,070	not published	45% of examined agents failed needs-based sales

Legend. Firms hold the licence and the budget. Professionals create the records. Transactions set the ceiling on usage.

The duty is the same shape in all four markets.

Establish what the person needs, consider the options, recommend with a reason, disclose what matters, obtain informed consent, and keep a re-performable record.

How Does This Impact You

T H E P E R S O N I S A S K E D T O T R U S T A F I L E N O B O D Y K E P T

The loan that was not five years	A buyer was told financing was \$57 a week including extras. Asked how long the loan ran, the salesman said 228 months , and explained it was five years
The coverage confirmed by telephone	A patient called twice to confirm chiropractic coverage, was told on both calls that it existed, and was refused afterwards. The calls were not in the file
The offers that were never registered	A homebuyer raised an offer after being told competing bids existed. There were zero registered offers
The penalty nobody explained	A homeowner said that with the information in front of them, the decision would have been different. The broker said the rule was explained verbally and could not be written into a system-generated document
The scale behind these accounts	Reported fraud losses in Canada passed \$704 million in 2025, and Finance Canada estimates only 5 to 10 per cent of incidents are reported

Company Overview

WHO WE ARE

Who we are

A Calgary software company building the record of what happened in a consequential consumer transaction. It never holds or moves client money, never signs a filing, and never decides anything for a customer.

Why now

Four Canadian regulators are converging on evidence of the decision. Ontario real estate brokerages file annually from **1 October 2026**, with monthly trust reconciliation planned for 2027.

Company Vision

WHY IT MATTERS

Protect the person. Strengthen the relationship. Prove what happened.

Consumer and professional are on the same side of a poor transaction, and one record serves both.

The standard

A record made while the decision is being made, kept under the rule in force then, and able to answer a question years later.

What it prevents

People forget, staff leave and systems change. The answer becomes retrieval, not search.

Built in Canada

Records are stored and processed in Canada, under Canadian privacy law, on infrastructure the customer controls.

Both sides hold it

A business can add context and a consumer can challenge an error. Neither can rewrite what occurred.

Management Team

WHO IS BUILDING IT

A founding team drawn from controls disciplines outside software: life safety work in oil and gas, and systems work at WorkSafe BC. Proving a thing was done rather than asserting it.

Where the Evidence of a Decision Lives Today

THE FRAGMENTATION, AND WHAT IS IN IT

This is not paperwork. It is what a named person said they needed, what they were shown, what they agreed to, and the reason a professional recommended one option over another. It exists. It is simply not in one place.

What that costs the firm

- **Reconstruction.** Days of work per disputed file, months after the event
- **Version.** Silent edits with no trail, so the file cannot show what was known when

and what it costs the person

- **Consent.** What was authorised, and when, cannot be established
- **Time.** A complaint takes months because both sides are arguing from memory

Pain Points, and the Events That Trigger Them

WHAT FIRMS ARE FEELING

- **Three events recur, and none of them is scheduled.** A consumer complaint, a supervisory examination, and the annual professional indemnity renewal
- **The duty is personal.** The principal broker or broker of record carries the supervision obligation in their own name
- **The file is assembled after the fact.** By the time the question arrives, the people and the systems have moved on
- **The cost is unbudgeted.** Remediation arrives with a deadline attached, at the moment the firm can least absorb it

What the regulators recorded in one year

- **\$15.7M** of errors and omissions payments in Ontario real estate
- **2,878** complaints opened at RECO, up 88 per cent
- **\$1.2M** of FSRA penalties across 100 enforcement actions
- **2,332** charges laid by OMVIC, with \$1.9M in fines

The firm is not asking for better compliance software. It is asking to stop losing arguments it should win.

Most of these firms did the work. The file cannot prove it, and under examination an unprovable file and a bad file look identical.

The Same Failure, Heard Four Ways

C O N S U M E R • P R O F E S S I O N A L • F I R M • R E G U L A T O R

1 The consumer

- I did not understand what I signed
- Nobody explained the options
- I found out after the money moved
- I have no copy of the reasoning

2 The professional

- I did the work and cannot prove it
- I rebuild files from memory and email
- A signed form is not my reasoning
- The duty is in my own name

3 The firm

- Complaints and exams never scheduled
- Remediation arrives with a deadline
- An unprovable file looks like a bad file
- The cost lands at the worst moment

4 The regulator

- I cannot see whether the test happened
- The file arrives months after the decision
- I sample because I cannot see the whole
- Every market records it differently

Four descriptions, one cause: the reasoning is never written down while the decision is being made.

Everything after that moment is reconstruction.

Nothing on the Market Covers the Full Duty

WHAT FIRMS ARE BUYING INSTEAD

The step in a consumer transaction	How well it is served today
01 Establish who the client is and what they want	Well served. Every vertical has a customer system
02 Move the transaction through to completion	Well served. Origination, forms, contracting, funding
03 File and retain the documents	Well served. Document stores, signature, retention
04 Show why the decision suited that consumer	Where every category below stops short
What a firm buys today	Where it stops
Customer and origination systems	They record what was submitted, not the reasoning behind it
Forms and electronic signature	A signed form proves a form was signed
Compliance consultants and file review	They arrive months later and bill by the hour
A spreadsheet and a shared folder	Free, the real competitor, and it fails under review

Legend. Step four is the one an examiner tests, an insurer argues over and a consumer disputes.

The 4orm Finance Solution

WHAT WE BUILT

4orm reads the systems. It never touches the money or the judgement.

The duty and the signature stay with the professional, so the product is buyable without a treasury review or a change of bank.

One Model, Separate Domains

H O W I T I S P U T T O G E T H E R

A business design, not an implementation: what the solution must do, not how it is built.

What the architecture must be able to do

How it is tested

Onboard a new regulated market as configuration, not a rebuild

A second market is configured in front of us

Reconstruct an earlier state rather than derive it by report

A dated state is produced from a live file

Legend. Invariants the build partner must demonstrate, not assert. Consumer and institutional data stay in separate domains: **a common architecture does not require common physical storage.**

What Was Known Then, and What Changed After

HISTORICAL TRUTH

A suitability question is answered twice: once at the moment of the recommendation, and again after the circumstances move. A system that stores only the final state answers neither. 4orm does not only preserve the final state.

1 What the record preserves

- What was known then
- What actually changed
- When the change occurred
- When the business learned about it
- Which decision relied on the earlier information
- What happened next

2 A worked example

Income at the recommendation: **\$120,000**, recorded with the facts relied upon. Later, new evidence arrives and income is **\$95,000**. The record carries a new dated version and the original survives.

Two questions, answered separately.

Was the recommendation reasonable on what was known then, and once circumstances changed, was suitability reconsidered?

4ormIQ and the Share of Consumer Trust

THE FREE LAYER, AND WHY IT EXISTS

Almost nobody searches for transaction integrity infrastructure. People arrive with an immediate question, usually about money that is about to leave. 4ormIQ answers that question, at no charge, and starts the relationship before a paid transaction exists.

1 What the person asks

- Should I send this money?
- Who am I actually dealing with?
- What does this document mean?
- Does this offer make sense?

2 What 4ormIQ returns

- What was found, and where it came from
- What could not be verified, said plainly
- The trade-offs and the missing information
- What to check next, before deciding

3.0M

4ORMIQ BY 2031, BASE CASE

4.5M

FREE CHECKS RUN IN 2031
BASE CASE

\$0

CHARGED TO THE
CONSUMER, EVER

\$704M

REPORTED CANADIAN FRAUD
LOSSES IN 2025

Missing information is not proof of wrongdoing, and the product never says it is. Free checks are a funnel measure, never revenue.

Why Trust Is the Distribution Strategy

4 O R M I Q · T H E S I X J O B S

The job	What it produces for the company	How it is measured
Attention	An immediate reason to discover 4orm	Checks run, and where they came from
Trust	Complicated financial information made clear	Return usage by the same person
Usage proof	People engage with something the company designs	Completion rate of a check
Learning	What people worry about before deciding	The questions asked, by market
Relationship	A relationship that exists before a paid transaction	Consumers arriving already holding a record
Distribution	The habit: check 4orm before you send	Referrals into a professional on the platform

Consumer trust is the asset an incumbent cannot copy from its side of the transaction.

A workflow platform represents its own customer.

What 4orm Finance Never Does

THE BOUNDARY

1 Never holds or moves client money

No trust account, no payment rail and no custody. The bank relationship does not change.

2 Never decides or advises

The recommendation belongs to the professional. The record holds the reason they gave, not a reason the software invented.

3 Never monitors communications

Messages are contributed by the consumer or the professional. Extracted facts stay linked to their source and are reviewed before use.

4 Never replaces the workflow

Customer, origination and dealer systems keep their jobs. 4orm reads from them and writes the record beside them.

A product that claims to remove the duty is selling the wrong thing.

The duty stays with the firm. What goes away is the part that is clerical, fragile and impossible to reconstruct under pressure.

What Changes for Our Clients

T H E P A Y O F F

1 Time

A complaint or an examination becomes a same day retrieval rather than a fortnight of assembly.

2 Money

Cost moves from unbudgeted remediation, which arrives with a deadline, to a budgeted subscription.

3 Resources

No new headcount. The person who already carries the duty keeps it, and stops re-proving last month.

4 Standing

The firm can show a client, a regulator and an insurer the same file, and all three see the same transaction.

- **The principal broker** stops being the single point of failure, and the only person who knows where anything is kept
- **The agent** is protected personally, because the reason for the recommendation is on the record rather than in a memory
- **The business** can answer a bank, a partner or an acquirer in an afternoon, and diligence stops being a fire drill

What Improves, for Each of Them

THE SOLUTION, VOICE BY VOICE

One record, four benefits. Nobody gives something up so somebody else gains.

1 The consumer

- Sees why this fits their circumstances
- Keeps a readable copy of the reasoning
- Checks a company free, before money moves

2 The professional

- A better conversation, not more forms
- Judgement supported, never replaced
- The reason recorded while it is fresh

3 The firm

- Same-day retrieval, not days of assembly
- Supervision visible as it happens
- Evidence at indemnity renewal

4 The regulator

- Can see whether the assessment was made
- A record another professional can re-perform
- The same shape across four markets

The consumer and the professional are on the same side of a poor transaction.

One record serves both, and the regulator gains without the company selling to one.

More Benefits That Pay for the Subscription

THE SECOND ORDER EFFECTS

Benefit	Why it follows from the record	Who feels it first
Fewer disputes start at all	Options and cost shown before signing leave less to dispute later	The agent, then the complaints handler
Supervision becomes continuous	Deficient files surface as they occur, not at the annual review	The principal broker or broker of record
Indemnity renewal changes	A dated record of disclosure argues from evidence at renewal	The owner, at renewal
The firm becomes acquirable on its files	A buyer can diligence transaction quality directly	The owner, at exit

The subscription is paid for by events that already happen.

Complaint handling, examination and indemnity renewal are operating costs today.

The Numbers Behind the Plan

B A S E C A S E , C A N A D A O N L Y

\$71.1M BASE CASE 2031 REVENUE CANADA ONLY	2029 FIRST YEAR EARNINGS TURN POSITIVE	\$3.55M SEED, SOLVED FROM THE OPERATING PLAN	60 INTERNAL PEOPLE IN 2031	
Canadian dollars	2027	2029	2031	Paid seats at 2031
Low, product proven, distribution not	\$161,132	\$2,587,432	\$10,540,040	10,000
Base, the planning case	\$937,888	\$18,728,038	\$71,065,963	40,000
Blue-sky, a few networks make it infrastructure	\$3,391,718	\$68,379,001	\$260,556,914	80,000

Legend. Year-end adoption is the input and revenue is the output. Gross margin holds near 81 per cent across all three cases.

One claim carries the plan: 40,000 paid professionals by 2031, 35,500 of them through 110 networks.
If the networks do not activate their members, the plan is the Low case.

How the Base Case Is Built

A D O P T I O N F I R S T , R E V E N U E S E C O N D

Year-end adoption, base case	2027	2028	2029	2030	2031
Active Canadians using 4ormIQ	75,000	350,000	1,000,000	2,000,000	3,000,000
Paid professional seats, direct	250	800	1,800	3,000	4,500
Paid professional seats, through networks	250	3,200	10,200	22,000	35,500
Organization accounts	8	40	100	220	400
Network partners	4	18	40	75	110
Embedded partners	1	8	20	40	70
Regulated payment customers	5	20	45	75	110

Legend. Adoption is typed in first. Revenue is what the price card makes of it, billed on the average of opening and closing counts rather than the closing figure.

Every figure in the plan traces back to this table. Change a line here and revenue, cost, headcount and the size of the round all move with it.

Where the Revenue Comes From

SEVEN LINES, ONE PLATFORM

Base case 2031 revenue by line, drawn to one scale from zero. The consumer product earns nothing here. It is the funnel every paid line draws on.

Network seats and their minimums carry 58 per cent of 2031.

One signed network is what settles that exposure.

What This Does Not Solve

THE HONEST LIMITS

It does not decide	A person still judges the recommendation and signs. The software presents the record and the rule that applied at the time
It does not train	It will not fix an untrained team, and it does not write the supervision programme for a firm that has never had one
It cannot look backwards	It cannot create records for the years before it was installed. Evidence starts on the day it is switched on
It does not end disagreement	A regulator can still disagree with a judgement. What changes is that the judgement is on the record
It is unproven at price	No customer has yet paid the price card. That is what the next ninety days are for

Four things a buyer should hear before the demonstration rather than after it.

The duty stays with the firm. This removes the part that is clerical and fragile, and leaves the part that requires a person.

Consumers understand the decision. Businesses can prove it.

Chad R. Johnston, Founder and Chief Executive · office@4ormfinance.com · 4ormfinance.com
